

1953

No. 1

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN FOR
ENGLAND AND WALES

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 10th JANUARY, 1953

Crown Copyright Reserved

LONDON: HER MAJESTY'S STATIONERY OFFICE

1953

One Shilling net.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Nov. 1	Nov. 8	Nov. 15	Nov. 22	Nov. 29	Dec. 6	Dec. 13	Dec. 20	Dec. 27	Jan. 3	Jan. 10	Totals from 1st Week of year in Great Towns ONLY

INFLUENZA	*Deaths	11	10	8	11	18	28	60	45	44	29	51	31	978

* Including influenzal pneumonia.

† The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 10th January, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 10th January, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 10th January, 1953.

**England and Wales, Administrative
Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

(b) New claims to injury benefit.

Week ended:—												
Jan. 6	13,100	1,600	2,200	1,500	1,400	1,200	600	1,000	900	400	500	1,000

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 10th January, 1953.

Daily Notes

Sunday—Cloudy. Intermittent light rain around mid-day.

Monday—Cloudy until early morning, then fair until early afternoon, afterwards cloudy. Light to moderate snow late. Fog in morning; mist afternoon and evening. Frost morning and evening.

Tuesday—Cloudy. Continuous moderate snow, then sleet, early. Light to moderate rain at times until late. Fog until mid-day; mist in afternoon.

Wednesday—Cloudy. Intermittent light rain early; light snow in morning. Intermittent light sleet and snow in evening. Mist in afternoon and evening. Fresh wind 01.55h., 02.25—40h., 03h.—04h. (NE).

Thursday—Cloudy until early evening, becoming fair to fine. Intermittent light sleet and snow in morning. Fog at times in morning, afternoon and evening, with periods of mist.

Friday—Cloudy. Intermittent light rain and drizzle morning and evening. Fog in morning, afternoon and evening, thick 16.20h.—18.10h., 19h.—23h. Frost in morning.

Saturday—Generally cloudy. Intermittent light rain and drizzle in afternoon and evening. Fog early, and in afternoon and evening, becoming thick from mid-evening.

The reading of the barometer rose from 1018.8 mbs. at beginning of week to 1028.0 mbs. at 23.05h. on 4th, fell to 1004.9 mbs. at 12.40h. on 6th, rose to 1022.1 mbs. at 10.25h. on 8th, fell to 1018.2 mbs. at 04.30h. on 10th, rose to 1026.4 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.

Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

BIRTHS AND DEATHS registered in the Quarter ended 31st December, 1952, and in the year 1952, with comparative figures for three earlier years. (The customary analysis will appear in the Quarterly Return in due course).

	LIVE BIRTHS.		STILLBIRTHS.		DEATHS (including non-civilians).		DEATHS of INFANTS under 1 year.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 17th January, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

Abbreviated List No.*	CAUSES OF DEATH	Deaths registered from 1st week of the year. 1952	Deaths registered during current week

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 17th January, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	Meningococcal infection D	Paralytic E	Acute polio-myelitis EF	Non-paralytic F	Infective G	Post Infectious K	Acute enceph-alitis GK	H	I	J	L	M	N	O	P	R	S

(b) New claims to injury benefit.

Week ended:—												
Jan. 13	14,400	2,000	2,300	1,800	1,600	1,400	600	1,100	900	400	600	1,800

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

Daily Notes

Sunday—Generally cloudy. Fog early, thick 00h.—01h.

Monday—Cloudy until around mid-day, fair in afternoon, fine in evening. Fog in late afternoon and evening, thick 15h.—24h.

Tuesday—Cloudy. Fog early, in morning and afternoon, and from mid-evening; thick 00h.—02h., 10.25h.—11.20h.; otherwise misty.

Wednesday—Cloudy. Fog all day, thick 05h.—10h., 18.50h.—24h. Intermittent light drizzle in afternoon; intermittent at to moderate rain in evening.

Thursday—Cloudy. Intermittent light rain and drizzle at times, moderate drizzle around 21h. Fog early, and at times throughout day, otherwise misty.

Friday—Cloudy, with sky obscured by fog for a time in morning and in evening. Fog until early afternoon, and from afternoon until end of day. Intermittent light drizzle in morning.

Saturday—Cloudy, sky becoming obscured by fog in evening. Intermittent light rain and drizzle at times. Fog throughout day, and from mid-afternoon until end of day.

The reading of the barometer rose from 1026.4 mbs. at beginning of week to 1032.8 mbs. at 10h. on 12th, fell to 1026.6 mbs. at 00.25h. on 16th, rose to 1028.6 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
- (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
- Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Estimates of Births. England and Wales.

- (a) Final estimate of live births to be expected in the quarter ending 31st March,
1953 170,000
- (b) Provisional estimate of live births to be expected in the quarter ending 30th
June, 1953 165,000

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample is derived from a proportion of the Main Consumer Office Areas containing about 30 per cent. of the population.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

† Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 24th January, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 24th January, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 24th January, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

*1951 Dec.	97,300	8,400	10,200	17,000	7,600	9,600	5,300	13,200	9,200	4,300	5,400	7,100

(b) New claims to injury benefit.

Week ended:—												
Jan. 20	14,000	2,000	2,300	1,800	1,600	1,200	500	1,000	900	400	500	1,800

* See Note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 24th January, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Sky obscured by fog at first, then cloudy, becoming fair in morning, then fine rest of day. Frost in evening.

Monday—Fine at first, becoming cloudy in morning, then sky obscured by fog. Mist at first, then fog all day, thick 09.30h., 11.30h.—12.15h., 14h.—24h.

Tuesday—Sky obscured by fog until mid-morning, then fair to fine. Fog most of day, thick 00h.—11.30h., 18.15h.—Frost and rime early.

Wednesday—Fair at first, then cloudy. Fog, thick 00h.—07.30h., until mid-evening, then mist. Frost in morning.

Thursday—Cloudy, becoming fair to fine in evening. Mist at times during day; fog in evening, thick 20.45h.—24h.

Friday—Fine early, becoming cloudy from mid-morning until end of day. Fog until mid-morning. Frost in morning, in evening.

Saturday—Cloudy. Sleet in evening, heavy 20.25—35h., 20.55h.—21.15h. Mist in evening. Dew in morning.

The reading of the barometer rose from 1028.6 mbs. at beginning of week to 2037.6 mbs. at 24h. on 19th, fell to 1028.8 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
- (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
- Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Including influenza pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 31st January, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 31st January, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 31st January, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	Meningococcal infection D	Paralytic E	Non-paralytic F	Acute polio-myelitis EF	Infective G	Post Infectious K	Acute enceph-alitis GK	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.										Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia	Smallpox.	Paratyphoid fever.	Typhoid fever.	Food poisoning.

Week ended:—												
Jan. 27	14,200	2,100	2,400	1,800	1,500	1,300	600	1,000	800	400	600	1,000

* See Note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 31st January, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Daily Notes

Sunday—Cloudy until around mid-day, then fair to fine until mid-evening, becoming cloudy. Mist in late afternoon early evening, fog for a time, then mist. Frost in evening.

Monday—Cloudy. Light to moderate rain late. Mist until mid-morning, haze in afternoon, then mist in evening.

Tuesday—Cloudy. Intermittent heavy rain early, intermittent light rain at times in morning, moderate to light in early afternoon. Fresh wind 03.25h.—05h. (SW), 10.30h.—15.50h. (W—WSW), 16.55h., 17.30—40h. (WSW), 19.05h.—19.45h. (WSW), 22.25h.—24h. (W).

Wednesday—Cloudy. Fresh wind 00h.—00.25h., 13.50h.—16.20h., 17.15h.—17.45h. (W). Dew in morning.

Thursday—Cloudy at first, then fair, becoming fine for a time in morning, then cloudy. Fresh wind 04.30h.—05.15h. (W).

Friday—Cloudy. Light drizzle in morning; intermittent light rain and drizzle in evening; heavy rain late. Fresh wind 05h.—24h. (SSW). Gust exceeding 38 m.p.h.:—21.20h. (SSW).

Saturday—Cloudy, except for a period in morning when fair, until late afternoon, then fair to fine. Gusts exceeding 54 m.p.h. at times throughout day (SW—NW). Gusts exceeding 54 m.p.h.:—12.05h. (WNW), 13.20h., 17.55h. (NW).

The reading of the barometer rose from 1011.8 mbs. at beginning of week to 1026.2 mbs. at 11h. on 26th, fell to 1017.0 mbs. at 16.15h. on 27th, rose to 1025.4 mbs. at 21h. on 29th, fell to 995.3 mbs. at 03.50h. on 31st, rose to 1012.5 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
 (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
 Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* Including influenzal pneumonia.

† The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 7th February, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 7th February, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 7th February, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A Cholera.	B Plague. * See Note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

Notes

Sunday—Cloudy to fair at first, then fine, becoming cloudy to fair until late afternoon, then fine. A slight shower of early. Fresh to strong wind 00h.—04h. (NNW), 04.45h.—06h. (NW), 06.40h.—15h. (NNW—N). Gusts exceeding 38 at times.

Monday—Fair at first, then cloudy, becoming fair to fine in evening. A slight shower of hail and a moderate shower afternoon; intermittent light rain in evening. Fresh wind at times (N—NNE). Gusts exceeding 38 m.p.h.:—12.35h., h., 13.30h. (NNE).

Tuesday—Fair at first, then cloudy.

Wednesday—Cloudy at first, then fine, becoming cloudy until mid-evening, fair afterwards. Very slight intermittent in afternoon. Fresh wind 14.25h. (WNW), 20.10—20.35h. (N). Frost in morning.

Thursday—Fair to fine until early afternoon; then cloudy until early evening, becoming fair to cloudy. Fresh wind 16.30h. (NNW). Frost in morning.

Friday—Coudy at first, becoming fair to fine in morning, then fair to cloudy. Haze in late afternoon and evening. Frost ening.

Saturday—Cloudy until mid-afternoon, then fair to fine. Mist morning, fog for a short time; mist in evening; then fog.

The reading of the barometer rose from 1012.5 mbs. at beginning of week to 1035.6 mbs. at 20.05h. on 3rd, fell to 0 mbs. at 14.35h. on 6th, rose to 1018.7 mbs. at end of week.

natory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the eter is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in 'column (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright ne on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 14th February, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 14th February, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

(b) New claims to injury benefit.

Week ended:—											
Feb. 10	13,700	2,100	2,200	1,700	1,600	1,200	500	900	800	400	500

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 14th February, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Cloudy with light to moderate snow and sleet in afternoon. Continuous moderate rain, heavy at times in evening. Fresh SSW wind 21.15h.—21.45h.

Monday—Cloudy at first becoming cloudy with intermittent rain, heavy at times, until evening. Fresh winds from SSW—50h. (WNW), 03.30h.—05.15h. (W).

Tuesday—Cloudy with continuous rain, heavy at times with soft hail in afternoon. Fresh winds most of day from SSW to NW. Squall at 04.35h. with gusts exceeding 38 m.p.h. at 04.35h., 04.40h. (WSW).

Wednesday—Cloudy with continuous rain, heavy at times turning to sleet and snow in late morning and continuing for the rest of day. Fresh N wind all day with gusts exceeding 38 m.p.h. at 05.45h., 09.10h. (NNW), 13.05h., 13.20h. (N).

Thursday—Cloudy with intermittent slight to moderate sleet and snow all day. Fresh NNE wind all day with gusts exceeding 38 m.p.h. at 16.05h. (NNE).

Friday—Cloudy with continuous slight snow most of morning and slight snow shower at mid-day. Fresh NNE wind from 13h., with gust exceeding 38 m.p.h. at 01.20h. (NNE).

Saturday—Fog at first becoming cloudy with continuous moderate snow until late afternoon, with a period of sleet in evening.

The reading of the barometer fell from 1018.7 mbs. at beginning of week to 962.7 mbs. at 11.40h. on 10th and rose to 1011.4 mbs. at 12.00h. on 13th, fell to 1017.2 mbs. at 07.00h. on 14th and rose to 1024.4 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.

Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 21st February, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 21st February, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* See Note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 21st February, 1953.

Notes

Sunday—Cloudy most of day, but fair for a short period in afternoon. Haze in afternoon and evening, mist later. Frost evening.

Monday—Cloudy at first, then fair, becoming cloudy again in evening. Fog in morning, and part of afternoon and evening. Haze in afternoon and evening.

Tuesday—Cloudy. Light drizzle and rain in afternoon and evening. Mist in morning, and in afternoon and evening.

Wednesday—Generally cloudy, with short periods when fair in early afternoon.

Thursday—Cloudy. Continuous light to moderate rain in morning. A moderate shower, with hail, in afternoon, becoming violent at 16.35h. Light showers in evening. Mist late afternoon and early evening.

Friday—Cloudy. Fresh wind 11.40—50h., 15.10—20h., 17.15—19h., 20.20h.—21h., 22.35h. (SW).

Saturday—Cloudy. Intermittent light rain early. Fresh wind 01.30h.—03.15h. (SW), 09.15—11.30h. (WSW).

The reading of the barometer rose from 1024.4 mbs. at the beginning of week to 1028.1 mbs. at 11h. on 16th, fell to 1020.0 mbs. at 14.10h. on 19th, rose to 1027.6 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1900. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 28th February, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 28th February, 1953.England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	Meningococcal infection D	Paralytic E	Non-paralytic F	Infective G	Post Infectious K	H	I	J	L	M	N	O	P	R	S

Week ended:—												
Feb. 24	14,400	2,200	2,400	1,800	1,600	1,300	500	1000	900	400	600	1,000

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 28th February, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Cloudy. Intermittent light drizzle in morning.

Monday—Cloudy. Fresh wind 02.15h., 04.15—25h. (WSW), 10.25h.—10.40h., 12.20h.—13h. (SW).

Tuesday—Cloudy at first, becoming fair most of day, except for a period in morning, when cloudy; cloudless in evening. Mist late evening. Dew in evening.

Wednesday—Fine at first. Sky becoming obscured by fog in morning, then fine, becoming fair to fine in evening. In morning, thick 04h.—08.15h; fog in evening. Frost and dew in morning.

Thursday—Fine at first, sky obscured by fog in morning, then generally cloudy. Fog in morning, thick 00h.—08.45h. mist and haze, becoming foggy again in evening, thick 21.30h.—24h. Frost in morning.

Friday—Cloudy at first, then sky becoming obscured by fog in morning, afterwards generally cloudy. Fog most of day, but for a period in afternoon, when hazy, thick 00h.—09.55h., 19h.—24h. Frost in morning, dew in evening.

Saturday—Cloudy until mid-morning, then generally fair. Fog in morning, thick 00h.—01.45h.; haze and mist in evening. in evening.

The reading of the barometer rose from 1027.6 mbs. at beginning of week to 1029.3 mbs. at 10.55h. on 22nd, fell to 1025.5 mbs. at 16.05h. on 23rd, rose to 1040.7 mbs. at 08.50h. on 28th, fell to 1037.7 mbs. at 24h. on 28th.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered in the area and have not been allocated to the area of residence*.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.
(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 7th March, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 7th March, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 7th March, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 7th March, 1953.

Notes

Sunday—Fair at first, then cloudy until early afternoon, becoming fair to fine, cloudy again in evening. Mist in morning, haze until early evening, then mist again. Dew in morning.

Monday—Cloudy. Mist at first, then fog rest of day, thick 19.30—24h. Frost morning and evening.

Tuesday—Sky obscured by fog until late morning, then fine. Fog most of day, thick 00h.—10h., 18.30h.—24h. Rime morning. Freezing drizzle at 09h.

Wednesday—Fine at first, then sky obscured by fog until mid-morning, becoming cloudy; fine by evening. Fog, thick 09.40h., in morning; fog in evening, thick 22.30h.—24h. Frost in morning.

Thursday—Cloudy. Fog, thick until 03h., until mid-evening, then mist. Frost in morning, dew in evening.

Friday—Cloudy until around mid-day, fair in early afternoon, then fine. Intermittent light drizzle in morning. Mist mid-day and in late afternoon, then fog. Frost in evening.

Saturday—Generally cloudy, with short periods in late morning and in early afternoon, then fair. Fog in morning, mist.

The reading of the barometer fell from 1037.7 mbs. at beginning of week to 1035.4 mbs. at 02.50h. on 2nd, rose to 1037.0 mbs. at 10h. on 5th, fell to 1032.4 mbs. at 05.50h. on 7th, rose to 1038.7 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.

Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 14th March, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 14th March, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 14th March, 1953. } Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A Cholera.	B Plague.	Meningococcal infection D	Paralytic E	Non-paralytic F	Acute polio-myelitis EF	Infective G	Post Infectious K	Acute enceph-GK alitis	H Typhus fever.	I Relapsing fever.	J Continued fever. (London only).	L Dysentery.	M Ophthalmia neonatorum.	N Puerperal pyrexia	O Smallpox.	P Paratyphoid fever.	R Typhoid fever.	S Food poisoning.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 14th March, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Cloudy until mid-morning, then fair until mid-evening, afterwards cloudy. Shallow mist in patches around mid-morning. Mist in evening. Frost in morning and evening.

Monday—Fine most of day, but cloudy around mid-day, and in early evening. Fog until mid-morning, thick until 08.35h. Mist in evening. Frost in morning.

Tuesday—Generally cloudy until mid-morning, with sky obscured by fog around 09h., then fair to cloudy until early evening, when fair. Fog in morning, thick 08h.—09h., fog in evening. Frost morning and evening.

Wednesday—Fine at first, becoming fair in morning, then cloudy from mid-morning until end of day. Mist early. Frost morning.

Thursday—Generally cloudy, with short periods when fair around mid-day.

Friday—Cloudy until early afternoon, then fair, becoming fine in evening.

Saturday—Cloudy until around mid-day, then fair, becoming cloudy from mid-evening. Mist early and in late afternoon early evening, fog for a short time. Fresh wind 20h.—21.30h. (ENE—E). Frost in morning.

The reading of the barometer rose from 1038.7 mbs. at beginning of week to 1044.6 mbs. at 10.15h. on 10th, fell to 1036.3 mbs. at 04.50h. on 12th, rose to 1040.2 mbs. at 23.25h. on 13th, fell to 1032.4 mbs. at 24h. on 14th.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.

Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 21st March, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 21st March, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 21st March, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

Week ended:—											
Mar. 17	14,400	2,100	2,400	1,800	1,700	1,200	500	1000	900	400	600

* See Note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the work population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 21st March, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

(Supplied by the Director of the Meteorological Office).

Notes

Sunday—Cloudy at first, then fine almost all day, except for a period in early evening, when fair. Mist in evening, etc. Frost morning and evening.

Monday—Fine early, becoming cloudy in early morning, then fair until mid-morning, afterwards fine. Fog until mid-
ing, thick 03h.—07.40h. Haze in evening; fog late.

Tuesday—Fine most of day, except for a period around mid-day, when fair, and in early evening, when cloudy.

Wednesday—Fine to fair at first, then cloudy. Haze in late afternoon and early evening.

Thursday—Cloudy. Fog in late afternoon and evening.

Friday—Cloudy. Mist at first, then fog for remainder of day. Very slight intermittent rain in morning. Dew in evening.

Saturday—Sky obscured by fog at first, then cloudy until early afternoon, becoming fair. Fog early, and in early
ng, otherwise misty. Dew early.

The reading of the barometer fell from 1032.4 mbs. at beginning of week to 1021.6 mbs. at 02.50h. on 16th, rose to
0 mbs. at 09h. on 17th, fell to 1024.4 mbs. at 17.25h. on 18th, rose to 1032.1 mbs. at 08.15h. on 21st, fell to 1031.2
at end of week.

anatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the
meter is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column
millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived
photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended
In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright
ine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and
readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.

Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 28th March, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year.	Deaths registered during current week												
			ALL AGES.	Under 4 weeks	4 weeks—under 1 year.	1-4 years.	5-14 years.	15-24 years.	25-34 years.	35-44 years.	45-54 years.	55-64 years.	65-74 years.	75 years and over

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 28th March, 1953. } Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

(b) New claims to injury benefit.

Week ended:—												
Mar. 24	14,200	2,100	2,300	1,800	1,700	1,200	500	1000	900	400	500	1,000

* See Note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 28th March, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Fair at first, becoming cloudy; fair to fine in late morning and afternoon, cloudy in evening. A slight shower in afternoon. Mist or haze most of day.

Monday—Generally cloudy, except for periods in morning and afternoon, when fair. Fog most of day, thick 20h.—24h.

Tuesday—Cloudy at first, sky obscured by fog in morning, cloudy until late afternoon, then fair to fine. Fog nearly all day, thick 00h.—09.15h., and 19.30h.—24h.

Wednesday—Fine almost all day, but sky obscured by fog for a time in morning, fair in early evening. Fog until late afternoon, thick 00h.—08.45h.; haze in evening, then mist. Dew in evening.

Thursday—Fine to fair until late morning, cloudy until mid-evening, then fine again. Continuous light to moderate rain after noon, heavy 15.20—40h., 15.55h.—16.50h. Fresh wind 10.10h.—10.45h. (WSW), 11.30h.—14.30h. (WSW—W).

Friday—Fine at first, then generally cloudy, becoming fine late. Haze for a time in mid-evening. Frost early.

Saturday—Fair at first, then cloudy all day. Continuous light to moderate rain, heavy 02.50h., 07.05—15h., 07.45h., and 19.30h.—24h. in early morning. Fresh wind 04.50h.—06.30h., 10.30h.—24h. Gusts exceeding 38 m.p.h.: 12.35h., 14.15h. 22.50h.

The reading of the barometer rose from 1031.2 mbs. at beginning of week to 1037.7 mbs. at 09h. on 24th, fell to 1011.7 mbs. at 14h. on 28th, rose to 1011.7 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* Not corrected for revision of diagnosis.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

(Including influenzal pneumonia.)

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 4th April, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. In London, it includes influenza pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 4th April, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 4th April, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals given against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

I	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A Cholera.	B Plague.	Meningococcal infection D	Paralytic E	Acute polio- myelitis EF	Infective G	Acute enceph- alitis GK	H Typhus fever.	I Relapsing fever.	J Continued fever. (London only).	L Dysentery.	M Ophthalmia neonatorum.	N Puerperal pyrexia	O Smallpox.	P Paratyphoid fever.	R Typhoid fever.	S Food poisoning.

Weekly Averages:—												
1953 Feb.	243,500	17,700	23,000	33,700	17,300	22,100	13,800	30,900	23,200	11,200	13,900	14,000
1952 Feb.	148,000	12,000	16,100	25,700	11,300	14,400	8,200	20,300	14,600	6,700	8,600	10,300
*1952 Mar.	130,700	9,800	14,700	24,100	10,200	12,700	7,100	17,700	12,500	5,600	7,600	8,800

(b) New claims to injury benefit.

Week ended:—												
Mar. 31	14,200	2,200	2,400	1,700	1,500	1,200	500	900	900	400	500	1,000

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 4th April, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Cloudy. A light shower in morning; intermittent light rain in afternoon and evening. Fresh wind 00h.—24h. Gusts exceeding 38 m.p.h.:—03.25—35h., 04.30h., 07.20h.—09.20h., 10.50h.,—16.05h., 16.30h., 17h.—17.10h., 17.30h., —18.15h. (SW).

Monday—Cloudy until early afternoon, then fair to fine. Continuous moderate to heavy rain from early morning until afternoon; intermittent light for a time in morning. Fresh to strong wind 07.40h.—08.40h. (SSW—SW), 15.20—25h. (W). Gusts exceeding 38 m.p.h.:—01.30h., 06.50h. (SSW), 07.45h.—08.30h., 08.45h. (SW), 15.20—30h., 18.55h. (W).

Tuesday—Fine at first, then fair most of day, except for a period in early evening, when cloudy; becoming fine late. Light shower.

Wednesday—Generally cloudy. Light showers in morning; prolonged showers in afternoon and evening, frequently heavy. Fresh to strong wind 12.30h.—14.35h. (SW). Gusts exceeding 38 m.p.h.:—11.35h., 11.45h. (SSW), 12.35h.—14.40h.

Thursday—Generally cloudy. Intermittent light rain and drizzle in morning. Light to moderate rain in late afternoon and evening, heavy at times. A heavy shower at 22h. Fresh to strong wind 10.10—30h., 11.25h.—13.50h. (SSW). Gusts exceeding 38 m.p.h.:—08h., 10.25—35h., 11.10h.—12.20h., 12.50h.—13.20h. (SSW).

Friday—Fair for a time, then generally cloudy.

Saturday—Fair to cloudy until mid-afternoon, then fair to fine. A heavy shower at 07.50h; thunder heard to E at 11.57h. Fresh wind 13.35 (WSW), 15h., 15.20h. (SW).

The reading of the barometer fell from 1011.7 mbs. at beginning of week to 1000.5 mbs. at 08.30h. on 30th, rose to 1003.5 mbs. at 12.10h. on 31st, fell to 997.6 mbs. at 19h. on 2nd, rose to 1007.8 mbs. at 20h. on 4th, fell to 1006.6 mbs. at 21.10h. on 5th.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Measles

Weekly notifications* of measles in 1952-53 compared with those in the corresponding weeks in 1951-52, 1950-51, 1949-50 and 1948-49. (See also Table IV).

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.
(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 11th April, 1953, with totals from the first week of the year to date. } **London.**

Weekly Averages:—											
1953 Feb.	243,500	17,700	23,000	33,700	17,300	22,100	13,800	30,900	23,200	11,200	13,900
1952 Feb.	148,000	12,000	16,100	25,700	11,300	14,400	8,200	20,300	14,600	6,700	8,600
*1952 Mar.	130,700	9,800	14,700	24,100	10,200	12,700	7,100	17,700	12,500	5,600	7,600

(b) New claims to injury benefit.

Week ended:—											
April 7	10,400	1,600	2,000	1,100	1,200	900	300	600	500	200	300

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 11th April, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

Notes

Sunday—Fine at first, then generally cloudy, but with short bright periods between showers. Light to moderate showers most of day, heavy 23.55h. Fresh wind 02.50h.—03.15h. (S), 08.50h.—19.40h. (S—WSW), 22.10—35h. (S). Gust 38 m.p.h.:—14.30h. (SSW).

Monday—Generally cloudy, with bright periods at times. Light to moderate showers most of day, heavy 04.25h., heavy rain at 10.30h., and at 11.31h. Thunder and lightning to SW at 11.22h., a light squall at 18.15h. Fresh wind SSW—at times throughout day.

Tuesday—Fine most of day, except for periods around mid-day and in early afternoon, when fair.

Wednesday—Fine to fair at first, then cloudy. Fog until 08h., thick 02h.—05.50h. Mock suns observed at mid-day.

Thursday—Cloudy. Intermittent slight rain in morning and at mid-day. Fresh wind 09.20h.—22.25h. (ENE—NE), 45h. (NE).

Friday—Cloudy most of day, with short periods when fair.

Saturday—Generally cloudy until evening, then fair. Fog for a time in early morning, becoming shallow. Fresh wind 17.30h. (S—SW).

The reading of the barometer fell from 1006.6 mbs. at beginning of week to 1000.9 mbs. at 16.15h. on 5th, rose to 1005.6 mbs. at 21h. on 7th, fell to 1005.6 mbs. at 04.15h. on 9th, rose to 1024.3 mbs. at 22.50h. on 10th, fell to 1011.6 mbs. at 01.15h. on 11th.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 31st March, 1953, with comparative figures for the First Quarters of three earlier years. (The customary analysis will appear in the Quarterly Return in due course).

First Quarter of:—	LIVE BIRTHS		STILLBIRTHS		DEATHS (including non-civilians)		DEATHS OF INFANTS under 1 year

* Not corrected for revision of diagnosis.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

- (a) London.
(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

BLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 18th April, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. In London, influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 18th April, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in { England and Wales, Administrative
the week ended 18th April, 1953. Areas and Port Health Districts.**

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	Meningococcal infection	D	Paralytic E	Acute polio-myelitis EF	Infective G	Post Infectious K	H	I	J	L	M	N	O	P	R	S

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 18th April, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

Notes

Sunday—Cloudy. Continuous light to moderate rain, heavy at times, from morning until early evening. A moderate squall at 21.20h. A gust exceeding 38 m.p.h. at 10.25h. (SSW).

Monday—Cloudy to fair until late evening, then fine. Moderate showers in morning and afternoon, heavy at 12h. wind 13.15—20h. (W), a squall at 11.55h. (NNW).

Tuesday—Fine at first, then cloudy for a time, becoming fair in morning, then generally cloudy with breaks. Light moderate showers throughout day, and a squall at 12.45h. (WNW). Fresh NNW winds at times.

Wednesday—Generally cloudy in morning, fair until mid-evening, then cloudy.

Thursday—Generally cloudy. Light drizzle in morning; light to moderate rain in morning and evening, heavy at 21.25h.—22.05h., 22.40h.—24h.

Friday—Cloudy. Continuous moderate to heavy rain, light at times in early morning, intermittent light at mid-day.

Saturday—Generally cloudy until early evening, except for a period in late morning, when fair, becoming fair to fine. wind 17.25h.—18.35h., 19.40h.—20h. (ENE).

The reading of the barometer fell from 1011.6 mbs. at beginning of week to 1004.6 mbs. at 14.50h. on 12th, rose to 1011.6 mbs. at 11.05h. on 15th, fell to 1010.6 mbs. at 03.10h. on 17th, rose to 1022.7 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

Estimates of Births. England and Wales.

(a) Final estimate of live births to be expected in the quarter ending 30th June, 1953	178,000
(b) Provisional estimate of live births to be expected in the quarter ending 30th September, 1953	168,000

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample is derived from a proportion of the Main Consumer Office Areas containing about 30 per cent of the population.

Neo-natal Mortality—1952.

The deaths of infants under 4 weeks during 1952 number 12,331, representing a rate of 18.9 per 1,000 related live births.

Number of Deaths and Death Rates from Tuberculosis and Cancer—1952.

The provisional numbers of deaths and death rates per million population for England and Wales during the year 1952 are as follows:—

	NUMBER			RATE		
	Males	Females	Persons	Males	Females	Persons
Respiratory Tuberculosis	6,421	2,914	9,335	304	128	212
Other Tuberculosis	694	556	1,250	33	24	28

Other Cancer	33,418	39,973	73,391	1,582	1,752	1,670

Maternal Mortality—1952.

The provisional number of deaths and death rate per 1,000 total live and stillbirths, in England and Wales are:—

	Number	Rate
Maternal causes, excluding abortion	405	0.5
Due to abortion	91	0.1
Total maternal mortality	496	0.7

Estimated mid-1952 female population age 15—44 9,399,000

I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 25th April, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g. influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 25th April, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 25th April, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

April 21	13,500	2,000	2,200	1,600	1,400	1,300	500	900	900	400	500	1,800

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 25th April, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Fine. Fresh wind 06.40—45h., 08.15h.—21.10h. (ENE). Dew in morning.

Monday—Cloudy until mid-morning, then fine. Dew in morning.

Tuesday—Fine. Dew in morning.

Wednesday—Fine. Dew in morning.

Thursday—Fine at first, cloudy for a time in morning, then fine rest of day. Dew in evening.

Friday—Fine at first, then sky obscured by fog for a time in morning, fair to cloudy in morning, then cloudy. Fog morning, thick 04.30h.—07.45h. Dew in morning.

Saturday—Generally cloudy until mid-evening, except for a period in early morning, when fair; fair to fine in evening.

The reading of the barometer rose from 1022.7 mbs. at beginning of week to 1024.5 mbs. at 23h. on 19th, fell to 1017.7 mbs. at 18.50h. on 25th, rose to 1015.2 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered in the area* and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

 NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
- (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
- Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 2nd May, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

(b) New claims to injury benefit.												
Week ended:—												
April 28	14,300	2,000	2,500	1,700	1,600	1,300	500	1000	900	400	500	1,000

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 2nd May, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

(Supplied by the Director of the Meteorological Office).

ly Notes

Sunday—Fine to fair at first, then generally cloudy, except for a period in mid-afternoon, when fair. Fresh wind 14.5h.—18.35h. (E). Frost in morning.

Monday—Cloudy until early evening, then fair to cloudy. Continuous moderate to heavy rain in early morning, then at drizzle until mid-day. Fog in morning. Fresh wind 13.30h., 14h.—14.25h., 15.40—50h. (SW). Dew in morning.

Tuesday—Generally cloudy. Continuous light to moderate rain in early morning, heavy at times. Light to moderate showers in afternoon, heavy at 16.02h. Fresh SW—W wind in afternoon.

Wednesday—Cloudy most of day, except for a period in morning, when fair. Light showers in afternoon. Continuous at to moderate rain in evening. Fresh SW'ly wind at times during day.

Thursday—Cloudy. Continuous moderate to heavy rain most of day, except for periods in early morning and late ning. Fresh to strong wind 04h.—05.20h. (SSW). Gusts exceeding 38 m.p.h.—03.15h., 04h., 04.20h., 04.50h., 05.05h., 20h. (SSW).

Friday—Cloudy. Continuous light to moderate rain until mid-afternoon, becoming intermittent until mid-evening. Heavy a 08.45—55h., 13.05h.—13.10h. Fresh wind 12.20h.—15.10h., 16.10h.—19.30h. (NNE).

Saturday—Generally cloudy until around mid-day, then fair, becoming fine. Fresh wind 11h.—11.05h., 12.30h.—15.55h. (E).

The reading of the barometer fell from 1015.2 mbs. at beginning of week to 990.5 mbs. at 04.30h. on 28th, rose to 99.1 mbs. at 19h. on 29th, fell to 1004.6 mbs. at 04h. on 30th, rose to 1031.2 mbs. at end of week.

planatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the rometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived om photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 50. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright nshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and can readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

Obtainable from

HER MAJESTY'S STATIONERY OFFICE

NOTES

1. **General.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. **Definition of areas.**—"London"=administrative county of London; "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; "C.B."=county borough; "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered in the area* and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 9th May, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 9th May, 1953.

England and Wales, Administrative Areas and Port Health Districts.

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 9th May, 1953. } Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Fine. Fresh wind 10.15h., 10.45—50h., 11.20h. (ENE).

Monday—Fine.

Tuesday—Fine until morning, then generally cloudy most of day, becoming fair to fine in evening. Frost in morning, in evening.

Wednesday—Fine until early afternoon, becoming fair, then cloudy by mid-afternoon. Mist for a short time in early morning.

Thursday—Fine at first, becoming generally cloudy until mid-afternoon, then fair to fine in afternoon; cloudy again in evening, then fair. Dew in morning.

Friday—Fair, then generally cloudy, becoming fair in afternoon, then fine. Dew in morning and evening.

Saturday—Fine early, becoming fair until mid-afternoon, then fine. Frost in morning, dew in evening.

The reading of the barometer fell from 1031.2 mbs. at beginning of week to 1020.2 mbs. at 17.25h. on 6th, rose to 1030.3 mbs. at 22.45h. on 8th, fell to 1015.8 mbs. at 19.35h. on 9th, rose to 1017.1 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

BLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 16th May, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 16th May, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 16th May, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

May 12	14,300	2,100	2,300	1,900	1,600	1,300	500	1100	800	400	500	1,000

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 16th May, 1953.

Notes

- Sunday—Fine at first, becoming cloudy to fair until early afternoon, afterwards generally fine, except for a period in evening, when fair. Dew in evening.
- Monday—Fine. Shallow fog for a short time in early morning. Frost in morning.
- Tuesday—Fine most of day, except for a period around mid-day when fair. Frost early.
- Wednesday—Fine at first, becoming fair until mid-afternoon, then cloudy. Fresh wind 13.15h.—22.15h. (ESE—E).
- Thursday—Generally cloudy. Continuous moderate to heavy rain early, intermittent in evening. Showers morning afternoon, heavy at 12.05h. A squall at 12.45h. (SSW), and a gust exceeding 38 m.ph. (SSW). Fresh SSW winds at times.
- Friday—Cloudy. Continuous light to moderate rain, heavy at times, almost all day. Gust exceeding 38 m.p.h. : n. (SSW). Fresh SSW wind at times.
- Saturday—Generally cloudy until late afternoon, then fair. Gusts exceeding 38 m.p.h. : 13.40—50h., 14.05h., 14.15h., n., 16.55h. (SW).

The reading of the barometer rose from 1017.1 mbs. at beginning of week to 1017.9 mbs. at 10.30h. on 10th, fell 9.6 mbs. at 04h. on 14th rose to 1011.7 mbs. at end of week.

Notes

- The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the meter is 34 feet above the mean level of the sea.
- Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.
- The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.
- The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).
- The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.
- The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 23rd May, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 23rd May, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 23rd May, 1953.

**England and Wales, Administrative
Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 23rd May, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Fair until morning, then generally cloudy until early evening, becoming fair. Light to moderate showers in afternoon; a light shower in afternoon. Fresh wind 06.30h. (SW), 08.50h.—16.50h. (SW—WSW).

Monday—Cloudy. Continuous moderate to heavy rain in late afternoon and evening, light at times; a moderate shower in afternoon; distant lightning at 19.30h. Fresh wind 14.50h.—16.25h. (E).

Tuesday—Generally cloudy until mid-evening, then fair. A slight shower early. Fresh wind 06.20h., 07.05h.—08.25h. 09h.—15.40h., 16.45—55h. (SW).

Wednesday—Fair at first, then fine until mid-morning, becoming cloudy by mid-day and remaining so. Dew in morning; moderate to heavy rain in evening, becoming light; heavy 22.30h., 23.30—40h.

Thursday—Cloudy, becoming fair by mid-evening.

Friday—Fair at first, then generally cloudy. Intermittent light rain in afternoon becoming continuous light to moderate in evening; very slight intermittent rain in evening.

Saturday—Generally cloudy until early evening, then fair to fine.

The reading of the barometer rose from 1011.7 mbs. at beginning of week to 1020.7 mbs. at 23.35h. on 17th, fell to 1016.4 mbs. at 24h., on 18th, rose to 1023.6 mbs. at 06h. on 20th, fell to 1016.4 mbs. at 18.35h. on 21st, rose to 1022.9 mbs. at 06h. on 22nd, fell to 1016.4 mbs. at 18.35h. on 23rd, rose to 1022.9 mbs. at 06h. on 24th.

Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

Obtainable from

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

 NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
- (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
- Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. In London, it includes influenza, influenza pneumonia, and influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 30th May, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week

* See Note 3.

† The Local offices of the Ministry of National Insurance were closed during week ended May 26 for one or more days.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 30th May, 1953.

Notes

Monday—Fine at first, then overcast until early morning, becoming generally fine. Fog in early morning, thick 01.30h.—Dew in morning.

Tuesday—Fine almost all day, except for a short period in afternoon, when fair. Mist in early morning. Fresh wind 20.50h. (NNW).

Wednesday—Fine at first, then fair most of day. Fresh wind 07.50h. (N), 08.10h.—09h. (NNW—N).

Thursday—Cloudy. A light to moderate shower in morning, then continuous light to moderate rain becoming heavy at times morning and afternoon. Heavy showers in evening, distant thunder 18.22h. Fresh wind 14.35h. (W), 20.50h.—21.10h. (N—NNE).

Friday—Cloudy at first, then fair until early evening, becoming cloudy for a time, then fair to fine. Fresh wind 08h. (N). Dew in morning.

Saturday—Fine to fair at first, then generally cloudy, except for a period in early evening, when fair. Fresh wind 08.10h. (NW). Dew in morning.

Sunday—Generally cloudy. Light rain in morning, a heavy shower at 10.05h., followed by light to moderate showers. Light rain in evening. Gusts exceeding 38 m.p.h.:—15.30h., 15.45h., 15.55h. (NNW).

The reading of the barometer rose from 1022.9 mbs. at beginning of week to 1024.8 mbs. at 08h. on 24th, fell to 1022.9 mbs. at 17h. on 25th, rose to 1027.3 mbs. at 12.30h. on 26th, fell to 1017.8 mbs. at 17.50h. on 27th, rose to 1030.5 mbs. at 17.50h. on 28th, fell to 1010.4 mbs. at 17h. on 30th, rose to 1013.1 mbs. at end of week.

Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from the meteorological records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine in each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 6th June, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

Late returns for week ended 30th May :—

Lleyllyn R.D. (Caernarvon) ...	1	-	-	-	-	-
--------------------------------	---	---	---	---	---	---

† Nil returns are not shown. Districts for which no return has been received are as follows:—Chester, Fowey.

‡ Returns still outstanding for week ended 30th May, 1953:—

Urban Districts:—Bideford M.B. (Devon), Crediton (Devon), Holsworthy (Devon), Knighton (Radnor), Presteign (Radnor).

Rural Districts:—Crediton (Devon), Masham (Yorks. N.R.).

TABLE V.—New claims to (a) sickness benefit under the National Insurance Act and (b) injury benefit under the National Insurance (Industrial Injuries) Act.

England and Wales
Standard Regions.

(Figures to nearest hundred).

(Supplied by the Ministry of National Insurance).

Period	England and Wales	Standard Regions									
		Northern	East and West Ridings	North Western	North Midland	Midland	Eastern	London and South Eastern		Southern	South Western
								London & Middx.	Remainder		
1	2	3	4	5	6	7	8	9	10	11	12
(a) New claims to sickness benefit.											
Week ended:—											
June 2	75,100	7,200	8,600	11,600	6,100	7,300	4,200	9,300	6,800	3,300	4,200
† May 26	83,200	7,800	9,500	14,100	7,000	8,500	4,400	9,900	7,200	3,700	4,600
May 19	103,400	9,200	11,300	17,600	8,600	10,400	5,800	12,900	9,400	4,600	5,700
May 12	108,800	9,500	11,700	18,800	9,100	11,100	6,200	13,500	9,700	4,600	6,200
Weekly Averages:—											
1953 April	116,200	9,600	12,800	19,000	9,300	11,600	6,900	14,700	10,700	5,600	6,800
1952 April	110,900	8,600	11,400	19,200	8,600	10,800	6,300	15,800	11,200	4,800	6,300
* 1952 May	91,600	7,900	9,300	14,800	7,100	9,500	5,100	12,700	8,800	4,200	5,400

(b) New claims to injury benefit.

Week ended:—											
June 2	10,500	1,700	1,600	1,300	1,100	900	400	800	600	300	400

* See Note 3.

† The Local offices of the Ministry of National Insurance were closed during week ended May 26 for one or more days.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 6th June, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

ly Notes

Sunday—Generally cloudy, except for a period in afternoon, when fair. Fresh wind 06.40h.—07.10h., 08h.—08.20h. (NW).

Monday—Generally cloudy, becoming fair in evening. Light showers in morning; moderate and heavy showers in afternoon. Gusts exceeding 38 m.p.h.:—12.20h., 13.30h., 13.35h., 15.10h. (NW).

Tuesday—Fair at first, then cloudy. Light to moderate showers at times until mid-evening, heavy at 12.33h. Continuous light rain late, intermittent at times. Gusts exceeding 38 m.p.h.:—14.30, 15.05h. (N).

Wednesday—Cloudy. Continuous light to moderate rain, heavy at times, in morning, intermittent slight rain in afternoon. Fresh wind 09h.—14.50h. (NNW—NW—NNW), 16.05h.—18.20h. (NNW).

Thursday—Generally cloudy, becoming fair in evening.

Friday—Cloudy. Dew in morning.

Saturday—Cloudy, becoming fine in morning, but cloudy again from mid-day.

The reading of the barometer fell from 1013.1 mbs. at beginning of week to 1001.1 mbs. at 02.40h. on 3rd, rose to 1023.2 mbs. at 08.10h. on 6th, fell to 1021.0 mbs. at 16.55h. on 6th, rose to 1021.8 mbs. at end of week.

xplanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 13th June, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

June 9	11,600	1,800	1,900	1,400	1,200	900	400	800	700	300	400	1,700

* See Note 3.

† The Local offices of the Ministry of National Insurance were closed during week ended May 26 for one or more days.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 13th June, 1953.

ly Notes

Sunday—Generally cloudy.

Monday—Cloudy until early afternoon, then fair, becoming fine.

Tuesday—Fine at first, then cloudy until mid-morning, becoming fine.

Wednesday—Fine until late morning, then generally fair, except for a period in mid-afternoon, when cloudy.

Thursday—Cloudy. A light shower in late morning. Continuous moderate to heavy rain in afternoon and evening, at times, becoming intermittent.

Friday—Cloudy. Moderate to light rain early, intermittent at times in morning; intermittent light drizzle in afternoon.

Saturday—Cloudy. Moderate to light rain early. Intermittent light rain and drizzle in afternoon and evening, continuous at times, heavy at 21.05h.

The reading of the barometer fell from 1021.8 mbs. at beginning of week to 1010.4 mbs. at 02.50h. on 12th, rose to 1013.8 mbs. at 21.25h. on 12th, fell to 1012.3 mbs. at 04h. on 13th, rose to 1013.0 mbs. at end of week.

planatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- | | |
|------------------|--|
| Quarterly | <p>(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).</p> <p>(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.</p> |
| Annual | <p>Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January.</p> <p>Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.</p> |

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 20th June, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week												75 years and over

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 20th June, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals
shown against the names of counties include any associated county boroughs. Letters in the
"Others" column denote the diseases so lettered in the summary headings.

* See Note 3.

† The Local offices of the Ministry of National Insurance were closed during week ended May 26 for one or more days.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

Daily Notes

Sunday—Generally cloudy, with short periods in morning and afternoon, when fair. Light rain in morning, a moderate shower in early afternoon; light to moderate rain in evening, heavy at times. Fresh wind 16.30h.—17.25h. (SW).

Monday—Generally cloudy, becoming fair in evening. Heavy rain at 06.08h., heavy and violent showers in afternoon. Thunder and lightning observed to S 15.56h.

Tuesday—Cloudy. Showers at times throughout day, heavy at 07.10h., 10.40h., 17.40h., 18.20h. Fresh wind 15.25—30h. (SW).

Wednesday—Generally cloudy. Light to moderate showers until mid-afternoon, heavy 12.20h.

Thursday—Cloudy at first, then fair most of day, except for a period around mid-day, when cloudy.

Friday—Cloudy. Light to moderate rain in morning and late afternoon, heavy at times, intermittent light drizzle and rain at times. Fresh SW wind at times until mid-evening.

Saturday—Generally cloudy. Fresh wind 09.20h.—16h. (SSW—SW).

The reading of the barometer fell from 1013.0 mbs. at beginning of week to 1003.9 mbs. at 16.55h. on 15th, rose to 1013.9 mbs. at 22h. on 18th, fell to 1011.6 mbs. at 09h. on 19th, rose to 1013.5 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight. Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. **General.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. **Definition of areas.**—"London"=administrative county of London; "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; "C.B."=county borough; "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 27th June, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 27th June, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A Cholera.	B Plague.	Meningococcal infection D	Paralytic E	Acute polio-myelitis EF	Infective G	Post Infectious K	H Typhus fever.	I Relapsing fever.	J Continued fever. (London only).	L Dysentery.	M Ophthalmia neonatorum.	N Puerperal pyrexia	O Smallpox.	P Paratyphoid fever.	R Typhoid fever.	S Food poisoning.

June 9	101,400	10,600	11,300	17,400	7,900	9,400	5,300	12,100	8,900	4,400	5,400	8,200
June 2	75,100	7,200	8,600	11,600	6,100	7,300	4,200	9,300	6,800	3,300	4,200	6,400
Weekly Averages :—												
*1953 May.	97,200	8,700	10,800	16,400	8,100	9,800	5,400	12,000	8,700	4,300	5,400	7,400
*1952 May.	91,600	7,900	9,300	14,800	7,100	9,500	5,100	12,700	8,800	4,200	5,400	6,900
1952 June.	85,400	7,600	8,900	13,600	6,800	9,000	4,700	11,300	8,100	3,900	4,800	6,000

(b) New claims to injury benefit.

Week ended:—												
June 23	13,100	2,000	2,200	1,700	1,400	1,200	400	900	800	400	500	1,000

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 27th June, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Daily Notes

Sunday—Generally cloudy. Intermittent light rain in late afternoon and early evening, becoming continuous light to moderate, heavy at times. Fresh wind 10.55h.—16h. (SSW—S), 16.30h. (S). Dew in morning.

Monday—Cloudy until around mid-day, then fair, becoming cloudy in evening. Light rain early, and two moderate showers. Distant lightning to North in late evening.

Tuesday—Generally cloudy. Very slight intermittent rain around mid-day. Dew in morning.

Wednesday—Generally cloudy. Intermittent light rain and drizzle in evening.

Thursday—Overcast until late morning, fine until early evening, then fair.

Friday—Fine to fair until mid-morning, then cloudy until mid-evening, becoming fair. Dew in morning.

Saturday—Fine at first, becoming cloudy, until early afternoon then fair, becoming cloudy again in evening. Fresh westerly wind in afternoon and evening.

The reading of the barometer fell from 1013.5 mbs. at beginning of week to 1008.9 mbs. at 00.50h. on 22nd, rose to 1018.5 mbs. at 00.01h. on 24th, fell to 1016.5 mbs. at 17h. on 24th, rose to 1019.5 mbs. at 06.50h. on 26th, fell to 1018.6 mbs. at 16.10h. on 27th, rose to 1020.2 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight. Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered in the area* and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
 (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
 Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 4th July, 1953, with totals from the first week of the year to date.

London

(See Notes on page 2).

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 4th July, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes

Sunday—Cloudy until early afternoon, becoming fair, fine in early evening, becoming cloudy later. Light to moderate in morning, heavy at 07.15h. Fresh winds 14.30h.—15h., 15.30h.—18.25h. (NNE).

Monday—Cloudy becoming fine early; cloudy to fair until mid-day, then fine. Distant lightning in late evening. Wind 09.45h.—19.20h. (ENE—E—ENE).

Tuesday—Fair becoming cloudy early, then fine until early afternoon becoming fair to cloudy. Distant lightning to 01h. Fresh wind 16.15h.—17.10h. (NNE).

Wednesday—Cloudy. Light to moderate rain in early morning, heavy at times. A thunderstorm passed from SSE—of the observatory in late afternoon. Fresh wind 20h.—20.30h. (ENE).

Thursday—Cloudy. Moderate to heavy rain late evening; heavy 23.20—50h.

Friday—Cloudy. Moderate to heavy rain, heavy 00.10h., 00.30—45h., becoming intermittent. Intermittent light drizzle morning.

Saturday—Generally cloudy, becoming fair to fine in evening. Dew in morning.

The reading of the barometer fell from 1020.2 mbs. at beginning of week to 1017.3 mbs. at 18h. on 28th, rose to 1019.6 mbs. at 00.55h. on 29th, fell to 1012.1 mbs. at 16.25h. on 1st, rose to 1022.3 mbs. at 10h. on 4th, fell to 1021.0 at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight. Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.

Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

** Return not received.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 11th July, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

CAUSES OF DEATH					Deaths registered from 1st week of the year. 1953	Deaths registered during current week

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in { England and Wales, Administrative
the week ended 11th July, 1953. Areas and Port Health Districts.**

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	Meningococcal infection D	Paralytic E	Non-paralytic F	Acute polio-myelitis EF	Infective G	Post Infectious K	Acute enceph-alitis GK	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.										Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia	Smallpox.	Paratyphoid fever.	Typhoid fever.	Food poisoning.

July 7	12,800	1,800	2,200	1,600	1,400	1,100	400	900	800	400	500

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 11th July, 1953.

Notes.

Sunday—Cloudy until mid-morning, becoming fair around mid-day, then cloudy. Dew in morning.

Monday—Generally cloudy, except for a period in early evening, when fair. Intermittent light to moderate rain and in morning, heavy rain 05.35h.

Tuesday—Generally cloudy until late afternoon, becoming fair, then fine. Intermittent slight drizzle in afternoon. wind 05.45h.—15.55h. (WSW—SW), 16.30h.—18.55h. (WSW).

Wednesday—Fine to fair at first, then cloudy. A slight shower in late morning. A mock sun seen at 05.30h. Fresh 09.45h.—11.25h. (WSW—WNW), 12h.—19h., 19.45h. (WSW).

Thursday—Generally cloudy until late afternoon, then fair. Light to moderate showers morning and afternoon, heavy 15h., 12.35h. and 13.38h. Thunder and lightning observed to SW—W in afternoon. Fresh WNW—NNW wind at times morning and afternoon.

Friday—Generally cloudy, with short periods in afternoon, when fair. Very slight to moderate showers in afternoon evening.

Saturday—Cloudy at first, then fair until mid-morning becoming cloudy, slight showers in late afternoon followed by of continuous slight rain, moderate at times until late evening. Fresh winds during afternoon. A mock sun seen on 14.00h.—16.00h.

The reading of the barometer fell from 1021.0 mbs. to 1009.6 mbs. at 16.50h. on 7th, rose to 1012.1 mbs. at 08.50h. on 8th, fell to 1010.5 mbs. at 03.25h. on 9th, rose to 1020.2 mbs. at 24.00h. on 10th, fell to 1009.2 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 30th June, 1953, with comparative figures for the Second Quarters of three earlier years. (The customary analysis will appear in the Quarterly Return in due course).

Second Quarter of:—	LIVE BIRTHS		STILLBIRTHS		DEATHS (including non-civilians)		DEATHS OF INFANTS under 1 year

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	May 9	May 16	May 23	May 30	June 6	June 13	June 20	June 27	July 4	July 11	July 18	Totals from 1st Week of year in Great Towns ONLY

* Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 18th July, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenza pneumonia.

** Return not received.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 18th July, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week

(b) New claims to injury benefit.

Week ended:—											
July 14	12,500	1,800	2,200	1,300	1,500	1,200	500	900	800	300	500

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 18th July, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Generally cloudy all day. Practically continuous light—moderate rain until mid-day, heavy at 01.10h.—01.40h., 02.30h., 03.10h., 03.30h., 06.35h.—08.20h. Light—moderate showers in afternoon. Heavy at 15.10h., 15.15h., 15.40h.

Monday—Cloudy until early evening when it became fair. Periods of light to moderate rain until early morning. Moderate to heavy showers in afternoon. Heavy shower at 19.15h.

Tuesday—Cloudy all day until late evening when it became fine. Moderate to heavy showers from mid-morning, developing into thunderstorms by mid-day. The main storm passed from SW—W of the station. Heavy showers at 13.25h., 14.39h.

Wednesday—Fair at first becoming cloudy at about 19h., becoming fine in early evening. Heavy shower at 11.20h. Heavy shower in afternoon.

Thursday—Cloudy all day. Showers developing after mid-day until late afternoon, becoming moderate to heavy rain at 18h. Slight rain from about 20h. Heavy rain 15.50h., 19.15—30h.

Friday—Cloudy becoming fine early, then cloudy until late evening when fine again. Moderate shower in morning. Heavy showers in afternoon. Fresh to strong wind during afternoon. Gusts exceeding 38 m.p.h. at 12.30h., 16.00h., 16.10h., 16.40h. (SW).

Saturday—Fine at first, cloudy during afternoon then fair. Moderate to heavy showers in morning and early afternoon. Heavy at 10.11h., 13.10h. Thunderstorms during afternoon dying out during early evening. Hail 17.15h. Violent showers 17.05h.

The reading of the barometer fell from 1009.2 mbs. to 996.1 mbs. at 19h. on 12th, rose to 1014.9 mbs. at 23.15h. on 13th, fell to 1007.3 mbs. at 05.25h. on 17th, rising to 1018.0 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

Obtainable from

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables 1, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

Estimates of Births. England and Wales.

(a) Final estimate of live births to be expected in the quarter ending 30th September, 1953	170,000
(b) Provisional estimate of live births to be expected in the quarter ending 31st December, 1953	155,000

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample is derived from a proportion of the Main Consumer Office Areas containing about 30 per cent. of the population.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note.—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. g., influenzal pneumonia.

** Return not received.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 25th July, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week

(b) New claims to injury benefit.

Week ended:—											
July 21	12,700	1,700	2,400	1,400	1,500	1,200	500	900	800	300	500

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 25th July, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Fine until mid-morning, becoming fair in late morning until mid-afternoon, then cloudy. Intermittent light rain in late evening. Fresh wind 11.30h.—12.20h. (W), 13.40h.—14h. (W), 17.00h.—17.30h. (SW). Dew in morning.

Monday—Cloudy all day until early evening, then fair. Moderate rain in early morning, becoming heavy, then con-sists of light. Heavy rain 00.35—45h. Fresh wind 02.15h.—05.30h. (SSW), 05.50h.—06.40h. (SW), 08.00h.—17.25h. (SW), 18.55h. (SSW)

Tuesday—Generally cloudy all day. Intermittent light rain in afternoon and early evening. Fresh wind 12.15h.—13.30h. (SSW), 13.30h.—14.10h. (SSW), 14.40h.—18.35h. (SSW—SW), 19.50h.—20.25h. (SW).

Wednesday—Generally cloudy all day, becoming fair in late evening. Short period of rain in morning, heavy 08.55h. and moderate showers in afternoon and early evening, heavy at 17.05h., 17.33h., and violent at 17.11h. Fresh wind 11h. (SSW), 13.00h.—14.30h. (SSW—W).

Thursday—Generally cloudy until mid-afternoon, then fair, becoming fine in mid-evening. Intermittent very light rain in early morning. Slight and moderate showers in morning, a moderate shower and a heavy shower in afternoon, 13.40h. Fresh wind 16.30h.—17h. (W).

Friday—Fine until mid-morning, then generally cloudy until late afternoon, becoming fine. Fresh wind 11.30h.—17h. 17.15h.—18.25h. (SSW).

Saturday—Fine until late morning, fair until late afternoon, then cloudy. A very slight shower in afternoon. Fresh wind 09.10h.—16h. (SSW—WSW), 18.10h.—18.20h. (WSW). Dew in morning.

The reading of the barometer rose from 1018.0 mbs. at beginning of week to 1023.5 mbs. at 00.01h. on 20th, fell to 1010.1 mbs. at 13.10h. on 22nd, rose to 1020.8 mbs. at 09h. on 24th, fell to 1010.1 mbs. at 16.25h. on 25th, rose to 1012.7 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

Obtainable from

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notification are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the year 1952—1947.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	May 23	May 30	June 6	June 13	June 20	June 27	July 4	July 11	July 18	July 25	Aug. 1	Totals from 1st Week of year in Great Towns ONLY

* Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 1st August, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 1st August, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

CAUSES OF DEATH				Deaths registered from 1st week of the year. 1953	Deaths registered during current week

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 1st August, 1953. } Areas and Port Health Districts.**

(See Notes on page 2).

*Note :—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

(b) New claims to injury benefit.

Week ended:—											
July 28	12,700	1,500	2,400	1,500	1,300	1,300	400	900	900	400	500

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 1st August, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Cloudy at first, fine for a time in early morning, then generally cloudy until mid-evening, becoming fair. A heavy shower at 08.31h.; light and moderate showers morning and afternoon. Gusts exceeding 38 m.p.h. in morning, SW'ly.

Monday—Fine at first, becoming generally cloudy until early afternoon, then fair to fine. A thunderstorm at mid-day W—N—ENE, overhead 12.05h.—12.20h.; showers in afternoon, violent at 16.10h., thunder and lightning at times, in morning.

Tuesday—Fair most of day. Dew in evening.

Wednesday—Fair at first, then generally cloudy. Intermittent light rain in morning, heavy to moderate in afternoon. Light shower in evening; light to moderate rain late.

Thursday—Generally cloudy. Light showers in morning and afternoon.

Friday—Cloudy until early evening, becoming cloudless. Continuous rain, moderate to heavy most of time, until afternoon. Mist and fog in morning; fog late. Fresh wind 13.30h.—15.40h. (N—NNE), 16.15h. (NNE).

Saturday—Fine to fair at first, then generally cloudy until early evening, becoming fair to fine. Light showers morning and afternoon. Fog early, thick 0.0h.—06.05h. Dew in morning.

The reading of the barometer fell from 1012.7 mbs. to 1005.0 mbs. at 17.40h. on 27th, rose to 1015.9 mbs. at 23h. on 28th, fell to 1006.2 mbs. at 11.35h. on 31st, rose to 1018.7 mbs. at 09.25h. on 1st, fell to 1017.9 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

Obtainable from

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Town”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1921. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1924, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further details of quarterly statistics see the Registrar General's Quarterly Return).
- (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neonatal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

FLUENZA	*Deaths	8	3	5	8	6	3	2	4	3	3	3,192	667	7,620

Including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 8th August, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 8th August, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

1952 July.	80,000	7,100	8,500	12,600	6,400	8,100	4,400	10,600	7,600	3,800	4,700

(b) New claims to injury benefit.

Week ended:—											
† Aug. 4	8,500	1,200	1,100	1,300	1,000	600	300	700	600	200	300

† The local offices of the Ministry of National Insurance were closed during the week ended August 4th for one more days

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the work population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 8th August, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

y Notes.

Sunday—Fair to fine at first then cloudy until early evening, becoming fair to fine again.

Monday—Fine until late morning, fair until early evening then fine.

Tuesday—Fair to fine at first, then cloudy until late afternoon, fair to fine in evening.

Wednesday—Generally cloudy. Intermittent light drizzle in late morning.

Thursday—Cloudy all day. Light showers in early afternoon.

Friday—Cloudy until late afternoon becoming fair, then cloudy for rest of day.

Saturday—Cloudy until early morning becoming fair, then cloudless for rest of day.

The reading of the barometer rose from 1017.9 mbs. at beginning of week to 1025.1 mbs. at 01.35h. on 4th, fell to 1022.1 mbs. at 19.00h. on 4th, rose to 1026.5 mbs. at 08.00h. on 6th, fell to 1020.7 mbs. at 18.00h. on 8th, rose to 1025.5 mbs. at end of week.

anatory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables 1, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

TABLE I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with Totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 15th August, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenza pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 15th August, 1953, } London.
with totals from the first week of the year to date. }

† The local offices of the Ministry of National Insurance were closed during the week ended August 4th for one or more days.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 15th August, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Fine until early evening, then fair, becoming cloudy. Fog in early morning, thick 05h.—05.45h. Dew in morning.

Monday—Fine most of day, except for a short period in afternoon, when cloudy. Shallow mist early. Dew in morning.

Tuesday—Generally fine, with short periods when fair around mid-day and in early morning. Fog in early morning, 03.30h.—05.15h. Dew in morning.

Wednesday—Fine at first, becoming cloudy by mid-day; fine in afternoon, becoming fair in evening. Slight fog in afternoon. Mist in early morning. Fresh wind 11.30h.—12h., 14.10h.—14.50h. (SSE). Dew in morning and evening.

Thursday—Fair at first, then generally cloudy until late afternoon, becoming fair in evening. Fresh wind 05.15—06.45h.—07.10h. (SW), 11h.—11.30h., 12.30h. (WSW), 15.15h.—17.10h. (WSW—SW). Dew in morning.

Friday—Fair at first, then fine; fair to cloudy from morning until late afternoon, becoming fine in evening. Dew in morning.

Saturday—Cloudy. Intermittent light rain in late afternoon. Dew in morning.

The reading of the barometer fell from 1021.5 mbs. at beginning of week to 1017.5 mbs. at 18.20h. on 9th, rose to 1020.3 mbs. at 07.20h. on 11th, fell to 1011.2 mbs. at 23.50h. on 12th, rose to 1021.7 mbs. at 07h. on 14th, fell to 1011.3 mbs. at 16.10h. on 15th, rose to 1015.6 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

The observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notification are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with Totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 22nd August, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenza pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 22nd August, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

† The local offices of the Ministry of National Insurance were closed during the week ended August 4th for one more days

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 22nd August, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Cloudy at first, becoming fine until late morning, then generally cloudy. Patches of shallow fog early. Dew in morning and evening.

Monday—Fair until mid-evening, then fine. Patches of shallow mist early. Fresh wind 11.55h.—12.10h., 12.55h.—1.15h. (SW).

Tuesday—Fair, cloudy at times, until late afternoon; fine in evening. Light to moderate rain in early morning, 04.30h., 06.40h. Fresh wind 05.35h.—06.45h. (SSW—SW). Dew in morning.

Wednesday—Fine to fair until morning, then generally cloudy. Light to moderate rain, heavy 20.50h.—21.10h., from afternoon until end of day. Fresh wind 13.45h. (SW).

Thursday—Generally cloudy, becoming fair for a time in mid-evening, then cloudy again. Continuous light to moderate rain, heavy at times, morning and evening. Light to moderate showers in afternoon.

Friday—Cloudy most of day. Light to moderate rain early. Light to moderate showers in afternoon and evening, 19.15h. and 21.20h. Distant thunder and lightning in afternoon and evening. Gusts exceeding 38 m.p.h. 14.10h. (W), 15.55h. (WSW).

Saturday—Generally cloudy until early afternoon, then partly cloudy. Fresh wind 08.45—55h., 09.15h.—18.10h. (WNW).

The reading of the barometer rose from 1015.6 mbs. to 1022.1 mbs. at 01h. on 17th, fell to 1001.0 mbs. at 05.20h. on 18th, rose to 1014.3 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

TABLE I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 29th August, 1953, with totals from the first week of the year to date.

London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the number is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 29th August, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

† The local offices of the Ministry of National Insurance were closed during the week ended August 4th for one more days.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 29th August, 1953.

Notes.

Sunday—Cloudy. Light to moderate rain, light drizzle at times, from morning until late afternoon. Heavy rain 10.05h., 10.15—20h., 17.15—25h. Fresh wind at times in afternoon and evening, SSW—SW.

Monday—Generally cloudy until late morning, then partly cloudy. Showers at times, heavy at 13.15h. A squall 25h. (WSW—WNW). Fresh WSW'ly wind at times, gust exceeding 38 m.p.h.:—13.30h.

Tuesday—Partly cloudy most of day. Fresh wind 08.55h.—11h. (W).

Wednesday—Cloudy at first, fine to fair until late morning, then generally cloudy until mid-evening, becoming fair to shallow mist in patches early. Dew morning and evening.

Thursday—Fine until early morning, then generally cloudy, except for a period in mid-afternoon, when fair. Dew morning and evening.

Friday—Generally cloudy. Dew in morning.

Saturday—Cloudy. Continuous rain, heavy at times, most of day. Fresh wind 13.30—55h., 19.30h.—20.05h. (SW).

The reading of the barometer fell from 1014.3 mbs. at beginning of week to 1007.6 mbs. at 13.15h. on 24th, rose to 1010.6 mbs. at 09.00h. on 28th, fell to 1012.5 mbs. at 16.30h. on 29th, rose to 1013.6 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I and II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

cluding influenzal pneumonia.

160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

E II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 5th September, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, including influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 5th September, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the number is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

1952 Sept.	102,500	9,300	11,000	17,800	8,000	10,400	5,200	13,600	9,100	4,300	5,600

(b) New claims to injury benefit.

Week ended:—											
Sept. 1	13,300	1,800	2,300	1,700	1,500	1,200	500	900	800	400	500

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 5th September, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Generally cloudy until early evening, then fair to fine. Light to moderate rain in early morning, heavy 05.40h., and at 07.35h. Fresh wind 01.20h.—02h. (SSW), 11.05h.—16h. (W).

Monday—Fair most of day, except for periods in morning and early evening, when cloudy, becoming fine in evening. Wind 12h.—17.45h. (SW). Dew in morning.

Tuesday—Fair until around 06h., then fine to fair. Fresh wind 14.05h.—17.50h. (SSW—SW). Dew morning and evening. Wind 14.05h.—17.05h. (SSW—SW).

Wednesday—Fair at first, then cloudy until mid-morning, afterwards generally fair to fine. Drizzle in morning, thick 08h., then rain, heavy 08.40h.—09.05h. Showers afternoon and evening. Fresh SSW—W wind at times. Gusts to 38 m.p.h.:—12.10h., 14.35h., 17.35h. (WSW).

Thursday—Fair at first, then generally cloudy until late afternoon, afterwards fair to fine. Fresh WSW—WNW wind. Dew morning and evening.

Friday—Fine at first, then cloudy until early afternoon, becoming fair. Intermittent light to moderate rain in morning, and mid-day. Shallow mist in evening. Dew in evening.

Saturday—Fair until mid-evening, then fine. Fog for a time in early morning. Dew morning and evening.

The reading of the barometer rose from 1013.6 mbs. at beginning of week to 1023.3 mbs. at 10.45h. on 31st, fell to 1013.6 mbs. at 09h. on 2nd, rose to 1032.3 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

The observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I and II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
- (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neonatal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

E II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 12th September, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 12th September, 1953, with totals from the first week of the year to date. } **London.**

(See Notes on page 2).

(b) New claims to injury benefit.

Week ended:—											
Sept. 8	14,100	1,900	2,500	1,800	1,500	1,200	500	1,000	900	400	500

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the definition of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 12th September, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

(Supplied by the Director of the Meteorological Office).

Notes.

Sunday—Fine at first, becoming fair until early afternoon, then fine. Dew in morning.

Monday—Fine. Dew in evening.

Tuesday—Fine. Mist for a time in morning; shallow mist in evening. Dew in evening.

Wednesday—Fine until morning, then generally cloudy until mid-evening, becoming fair. Shallow fog in morning.

Thursday—Fair at first, then generally cloudy until mid-evening, becoming fair to fine. Dew in evening.

Friday—Fine until around 0.7h., fair until late afternoon, then cloudy. Dew in morning.

Saturday—Generally cloudy until mid-evening, then fair.

The reading of the barometer rose from 1032.3 mbs. at beginning of week to 1034.3 mbs. at 09.30h. on 6th, fell to 1032.3 mbs. at 04.50h. on 10th, rose to 1021.7 mbs. at 0.9h. on 11th, fell to 1017.7 mbs. at 15.50h. on 11th, rose to 1020.2 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

The observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By Post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with Totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

INFLUENZA *Deaths	2	4	3	3	—	2	3	1	—	1	1	3,200	691	7,643

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

E II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 19th September, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 19th September, 1953, with totals from the first week of the year to date. } **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the number is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in the week ended 19th September, 1953.	England and Wales, Administrative Areas and Port Health Districts.
--	---

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals given against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

returns for week ended 12th September :—

nd Willington													
(Durham) ...	1	4	-	-	-	-							

returns are not shown. Districts for which no return has been received are as follows:—Penzance.

returns still outstanding for week ended 12th September, 1953:—

Urban Districts:—Bowdon (Chester), Whaley Bridge (Derby), Crediton (Devon), Swanscombe (Kent),
Beccles M.B. (Suffolk, East), Northallerton (Yorks., N.R.).

Rural Districts:—Aylesbury (Bucks.), Crediton (Devon), Masham (Yorks., N.R.).

TABLE V.—New claims to (a) sickness benefit under the National Insurance Act and (b) injury benefit under the National Insurance (Industrial Injuries) Act.

England and Wales
Standard Regions

(Figures to nearest hundred).

(Supplied by the Ministry of National Insurance).

Period	England and Wales	Standard Regions									
		Northern	East and West Ridings	North Western	North Midland	Midland	Eastern	London and South Eastern		Southern	South Western
								London & Middx.	Remainder		
1	2	3	4	5	6	7	8	9	10	11	12
(a) New claims to sickness benefit.											
Week ended:—											
Sept. 15	98,700	8,900	10,700	18,000	8,300	9,800	5,000	12,000	8,200	3,900	5,300
Sept. 8	95,900	8,500	11,700	17,200	7,900	9,400	4,800	11,600	7,900	3,800	5,100
Sept. 1	88,500	7,800	9,800	16,000	7,300	8,800	4,600	10,900	7,600	3,700	4,900
Aug. 25	87,800	8,000	9,800	15,000	7,300	8,900	4,700	10,900	7,700	3,800	4,800
Weekly Averages:—											
1953 Aug.	79,700	7,300	8,600	14,500	6,300	7,200	4,400	10,100	7,300	3,600	4,400
*1952 Aug.	79,500	7,600	8,400	13,600	6,200	7,600	4,300	10,300	7,200	3,500	4,400
1952 Sept.	102,500	9,300	11,000	17,800	8,000	10,400	5,200	13,600	9,100	4,300	5,600

(b) New claims to injury benefit.

Week ended:—											
Sept. 15	14,000	2,100	2,000	1,800	1,600	1,300	500	1,000	900	400	500

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the work population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 19th September, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

Notes.

Sunday—Fair at first, then generally cloudy. Mist and fog in early morning. Dew morning and evening.
Monday—Cloudy at first, becoming fair by morning, then generally fine. Fresh wind 10.15h. (ESE), 10.55h.—16.10h. Dew morning and evening.
Tuesday—Fair at first, becoming generally cloudy. Heavy rain 03.05h., continuous moderate to heavy rain in afternoon. Dew and haze in morning.
Wednesday—Generally cloudy until late afternoon, then fair. Light to moderate rain early. Heavy showers 09.45h.—12.2h. Distant lightning to SE at 21.10h. Fresh SSE—S wind at times.
Thursday—Fair at first, then generally cloudy, becoming fair again from mid-evening. Showers, heavy 01.45h. and in early morning and afternoon; rain, heavy 11.05h.—11.40h. in morning. A mock sun seen 06.45h. Thunder heard 11.15h. NNW in afternoon. Dew in evening.
Friday—Fair to fine at first, becoming generally cloudy. Dew morning and evening.
Saturday—Fine at first becoming cloudy. Shower late morning. Moderate to heavy rain in late evening until end of week. Heavy at 22.40h., 22.50h., 23.20—50h.
The reading of the barometer fell from 1022.4 mbs. at beginning of week to 1002.4 mbs. at 16.35h. on 15th, rose to 1010.8 mbs. at 09.00h. on 18th, fell to 998.7 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.
The observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 6 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.
The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.
The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).
The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.
The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 26th September, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 26th September, 1953, with totals from the first week of the year to date. } London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the number is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 26th September, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals given against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 26th September, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Generally cloudy all day except for a period in early morning, when fair. Continuous moderate and heavy rain in early morning, heavy at 00.40h.—01.30h., 01.35h.—02.20h., 02.30—35h. Fresh wind 00.05—50h. (S), 14.40h.—15.00h.

Monday—Generally cloudy all day. Moderate to heavy rain in early morning becoming showers which continued out the day, heavy at 12.05h. Heavy rain 03.10—15h., 05.10—15h., 05.35—40h. Fresh wind 01.20h.—05.00h. (S), 05.20h. (W), 07.45h.—08.00h. (SW), 08.10h.—24.00h. (SW). Fresh to strong 08.50h.—09.15h., 09.50h.—13.50h. (SW), 14.00h.—18.30h. (SW), 18.50h.—22.05h. (SW), 22.40h.—24.00h. (SW). Gusts exceeding 38 m.p.h.: 09.50h.—24.00h. (SW) short breaks.

Tuesday—Generally cloudy all day. Light to moderate showers in early morning. Intermittent slight rain during afternoon. Continuous light to moderate rain almost all evening; heavy 17.22—35h., 19.25—35h., 23.35h.—24.00h. Fresh wind 00.01h.—16.50h. (SW—WSW). Fresh to strong 00.01h.—04.00h. (SW). Gusts exceeding 38 m.p.h.: 00.01h.—03.50h. 12.45h. (SW).

Wednesday—Generally cloudy all day except for a short period in afternoon when fair, becoming fair again in late afternoon. Continuous moderate to heavy rain in early morning, heavy at 00.01h.—10h., 00.50h.—01.05h.

Thursday—Generally cloudy all day. Light to moderate showers in early afternoon, heavy at 13.07h., 13.28—35h. Thunder and lightning to West at 13.12h. Mist and fog occurred during the evening. Dew in morning.

Friday—Sky obscured by fog until mid-morning, becoming fair until the evening when cloudy. Thick fog 05.30h.—06.50—55h. Dew in morning and evening.

Saturday—Sky obscured by fog until mid-morning, becoming fair until the evening, when fine. Mist and fog occurred during the evening. Thick fog 04.00h.—09.15h. Dew in morning and evening.

The reading of the barometer fell from 998.7 mbs. at beginning of week to 996.6 mbs. at 02.30h. on 20th, rose to 998.4 mbs. at 20.50h. on 20th, fell to 988.4 mbs. at 14.40h. on 21st, rose to 999.2 mbs. at 13h. on 22nd, fell to 990.4 mbs. at 05h. on 23rd, rose to 1020.3 mbs. at 09h. on 26th, then fell to 1016.7 mbs. at end of week.

Story Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

Obtainable from

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I and II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 3rd October, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 3rd October, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1953	Deaths registered during current week												75 years and over

Week ended:—											
Sept. 29	14,500	2,200	2,300	1,800	1,600	1,300	600	1,000	1,000	400	500

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the work population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians work for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 3rd October, 1953. } Certain Great Towns in England and Wales and four Scottish and Irish Towns

Notes.

Sunday—Sky obscured by fog at first, becoming overcast. Moderate to thick fog, thinning towards mid-day, thickening after mid-day, then clearing again by mid-evening. Moderate to heavy rain in early afternoon, slight to moderate then periods of moderate to heavy during evening.

Monday—Cloudy, becoming fine in morning, becoming cloudy after mid-day until early evening, then fine.

Tuesday—Fine at first, becoming fair, then cloudy until late evening, then fine. Intermittent slight rain in evening.

Wednesday—Generally cloudy all day. Slight drizzle early. Periods of slight rain during evening.

Thursday—Cloudy, becoming fair, then fine. Dew in evening.

Friday—Cloudy at first, then fine for a short period in morning, becoming cloudy until late evening, then fine. Thick patches towards late evening. Dew morning and evening.

Saturday—Cloudless at first, then sky obscured by fog until late morning, afterwards generally cloudless, except for a period in early evening, when fair. Fog, thick at times, until late morning. Mist in evening; shallow fog at 9.45h. morning and evening.

The reading of the barometer fell from 1016.7 mbs. at beginning of week to 1007.0 mbs. at 20.20h. on 27th, rose to mbs. at 09.15h. on 29th, fell to 1023.5 mbs. at 05.15h. on 30th, rose to 1029.8 mbs. at 21.40h. on 1st, fell to 1020.6 mbs. at 04.50h., then rose to 1023.8 mbs. at end of week.

Story Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the bar is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 30th September, 1953, with comparative figures for the Second Quarters of three earlier years. (The customary analysis will appear in the Quarterly Return in due course).

Third Quarter of:—	LIVE BIRTHS		STILLBIRTHS		DEATHS (including non-civilians)		DEATHS OF INFANTS under 1 year

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 10th October, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 10th October, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 10th October, 1953. } Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

								London & Middx.	Remainder		
1	2	3	4	5	6	7	8	9	10	11	12
(a) New claims to sickness benefit.											
Week ended:—											
Oct. 6	125,200	11,300	14,000	22,500	9,900	12,300	6,500	15,900	11,000	5,200	6,700
Sept. 29	115,400	10,200	13,000	20,800	9,300	11,600	5,700	14,400	10,100	4,600	6,300
Sept. 22	107,700	9,800	12,500	19,400	8,700	10,700	5,300	13,100	9,100	4,200	5,700
Sept. 15	98,700	8,900	10,700	18,000	8,300	9,800	5,000	12,000	8,200	3,900	5,300
Weekly Averages:—											
*1953 Sept.	101,200	9,000	11,500	18,300	8,300	10,100	5,100	12,400	8,500	4,100	5,400
1952 Sept.	102,500	9,300	11,000	17,800	8,000	10,400	5,200	13,600	9,100	4,300	5,600
*1952 Oct.	121,600	10,500	12,500	20,400	9,500	12,000	6,500	17,400	11,700	5,200	6,800

(b) New claims to injury benefit.

Week ended:—											
Oct. 6	14,600	2,100	2,400	2,000	1,600	1,300	500	1,100	1,000	400	500

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the work population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 10th October, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

Notes.

Sunday—Fair at first, then generally cloudy, becoming fine in evening. Mist early. Dew in morning.

Monday—Fine most of day, except for a period around mid-day and in early afternoon, when fair. Shallow mist and mist in evening, becoming fog. Frost in morning, dew in evening.

Tuesday—Fine at first, then sky becoming obscured by fog until mid-morning; afterwards generally fair until mid-morning becoming cloudy. Fog in morning, thick 05.30h.—08.45h.; haze and mist in evening.

Wednesday—Generally cloudy. Mist early. Dew in morning.

Thursday—Generally cloudy until mid-morning, fair until early afternoon, then cloudy until mid-evening, becoming fair in evening.

Friday—Fine at first, sky becoming obscured by fog in early morning, then fine except for a short period in afternoon. Fog morning and evening, thick 05h.—08.15h., 19.45h.—20.55h. Dew morning and evening.

Saturday—Fine at first, sky obscured by fog for a time, then fine again, becoming fair by mid-day and cloudy in evening, then fine. Fog morning and evening, thick 02h.—06.30h. Dew morning and evening.

The reading of the barometer rose from 1023.8 mbs. at beginning of week to 1035.2 mbs. at 09h. on 5th, fell to 1020.0 mbs. at 16.35h. on 7th, rose to 1030.1 mbs. at 09h. on 9th, fell to 1020.0 mbs. at 24h. on 10th.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1953. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
- (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* Not corrected for revision of diagnosis.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

E II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 17th October, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. As of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of fast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 17th October, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the number is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.
the week ended 17th October, 1953.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	Meningococcal infection	Paralytic	Non-paralytic	Infective	Post Infectious	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia	Smallpox.	Paratyphoid fever.	Typhoid fever.	Food poisoning.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

res.

Monday—Fine at first, then sky obscured by fog until late morning, afterwards fine. Fog until mid-day, thick 01.30h.—mist in evening, fog late. Dew morning and evening.

Tuesday—Fine at first, then cloudy all day. Intermittent light rain and drizzle at times morning and afternoon; light to moderate rain, heavy 21.15h.—22.05h. in evening. Fog until early afternoon, mist in evening.

Wednesday—Cloudy. Continuous light to moderate rain early, becoming continuous heavy 04.50h.—10.50h., then to light. Mist early, fog in morning, then mist until early afternoon.

Thursday—Cloudy. Intermittent light drizzle in morning. Fresh wind 02.50h.—15.45h. (N—NNE), 18.15h., 22.15h. (NNE).

Friday—Cloudy. Fresh wind 03.40h. (NNE).

Saturday—Cloudy at first, fair in morning, then cloudy again from late morning. Fog in evening. Dew morning and

Sunday—Cloudy at first, then sky obscured by fog until mid-morning; cloudy rest of day, sky obscured by fog for mid-afternoon. Light to moderate rain and drizzle at times.

Reading of the barometer fell from 1020.0 mbs. at beginning of week to 998.7 mbs. at 12h. on 13th, rose to 1024.3 mbs. at end of week.

Notes

Results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from graphic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine in each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE

AND

GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables 1, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

ESTIMATES OF BIRTHS. ENGLAND AND WALES.

The forecasts of the number of births to be expected in the current and following quarters, which would normally be published in this Return, will appear next week.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

ding influenzal pneumonia.

60 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were obtained in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 24th October, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 24th October, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the number is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 24th October, 1953. } Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals given against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	Meningococcal infection	Acute poliomyelitis		Acute encephalitis		H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.		Paralytic	Non-paralytic	Infective	Post Infectious	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia	Smallpox.	Paratyphoid fever.	Typhoid fever.	Food poisoning.

1952 Sept.	102,500	9,300	11,000	17,800	8,000	10,400	5,200	13,600	9,100	4,300	5,600
*1952 Oct.	121,600	10,500	12,500	20,400	9,500	12,000	6,500	17,400	11,700	5,200	6,800

(b) New claims to injury benefit.

Week ended:—											
Oct. 20	14,600	2,100	2,400	1,900	1,500	1,300	600	1,100	1,100	400	600

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 24th October, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

s.

Monday—Cloudy. Moderate to light rain in morning. Dew in evening.

Tuesday—Cloudy. Intermittent light rain and drizzle in morning. Mist late afternoon and late evening. Dew in evening.

Wednesday—Generally cloudy until late afternoon, then fair for a time, sky becoming obscured by fog from mid-afternoon. Mist until late afternoon, then fog, thick 18.05h.—19h. Dew morning and evening.

Thursday—Sky obscured by fog until morning, then cloudy. Mist from 08.45h. until mid-afternoon, then fog morning and evening.

Friday—Cloudy, but sky obscured by fog for a time in evening. Light to moderate rain and drizzle in morning. At 10h. mist for a time, fog again from 07.30h. to end of period, thick 20.50h.—21.15h., and 21.30h.—24h. Dew in evening.

Saturday—Generally cloudy. Light to moderate rain for periods in morning and evening, heavy 08.25h., 18.30—40h. Morning, thick 0.0h.—06.15h.

Sunday—Cloudy at first, then sky obscured by fog; cloudy again until mid-evening, then fine. Very slight inter-mist in afternoon; rain late, heavy 23.45h., 23.55h.—24h. Fog in morning, thick 05.45h.—08.30h.

The reading of the barometer rose from 1028.2 mbs. at beginning of week to 1030.8 mbs. at 10h. on 18th, fell to 1011.7 mbs. at 15.15h. on 23rd, rose to 1016.1 mbs. at 08h. on 24th, fell to 1008.9 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

The observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from the graphic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine for each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre in columns 12, 13 and 14).

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

Estimates of Births. England and Wales.

(a) Final estimate of live births to be expected in the quarter ending 31st December, 1953	155,000
(b) Provisional estimate of live births to be expected in the quarter ending 31st March, 1954	170,000

In the above estimates regard has been had to (1) sample returns of the number of specialisation books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample is derived from a proportion of the Main Consumer Office Areas containing about 30 per cent of the population.

After the publication in January, 1954, of the estimates of live births expected in the March and June quarters of 1954, it is proposed to discontinue the series on the ground that the quarterly fluctuations in the number of births have now become insignificant in relation to the numbers involved.

Figures showing the number of births registered in England and Wales each quarter will continue to be published about the third week following the end of the quarter.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

TABLE I. Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notification of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Aug. 22	Aug. 29	Sept. 5	Sept. 12	Sept. 19	Sept. 26	Oct. 3	Oct. 10	Oct. 17	Oct. 24	Oct. 31	Totals from 1st Week of year in Great Towns ONLY

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

TABLE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 31st October, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 31st October, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * where the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 31st October, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns

es.

Monday—Cloudy at first, then fair most of day, except for periods in morning and mid-afternoon, when cloudy. Rain at first, heavy 0.0h.—00.20h. and 00.50h. A moderate shower in morning. Fog in patches early.

Tuesday—Fair at first, then fine for a time, becoming cloudy by mid-day; fair in afternoon, cloudy again in evening. Light drizzle and light to moderate rain in evening. Fresh wind 12h.—24h. (S—SSE).

Wednesday—Cloudy. Continuous moderate to heavy rain until early afternoon, becoming light. Fresh wind 0.0h.—24h. (SSE—S).

Thursday—Cloudy. Light to moderate rain in morning until early afternoon. Mist in late afternoon, fog in evening thick 21.15h.—24h. Dew in morning.

Friday—Cloudy until mid-morning, fair until early evening, then fine. Fog in morning, thick 0.0h.—04.30h., haze in mid-day; haze in afternoon, fog in evening, thick 18.15h.—20.45h. Dew morning and evening.

Saturday—Cloudy until mid-afternoon, then fair to fine. Intermittent light rain in morning, becoming continuous in afternoon; heavy at 10.35h.—12h., 12.10h.—12.30h. Fog early, mist in evening. Dew in evening.

Sunday—Cloudy. Heavy to moderate rain late morning, heavy 10.05h., 10.20h.—11.25h. Intermittent light rain in afternoon and evening, heavy 22.15h. Fresh wind 12.20h.—24h. (S—SSE—S).

The reading of the barometer fell from 1008.9 mbs. at beginning of week to 1006.8 mbs. at 04.50h. on 25th, rose to 1009.1 mbs. at 00.01h. on 26th, fell to 995.1 mbs. at 05.30h. on 27th, rose to 1016.2 mbs. at 11h. on 29th, fell to 1007.3 mbs. at 2.50h. on 30th, rose to 1011.4 mbs. at 00.01h. on 31st, fell to 999.9 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

The observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

- Quarterly** (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
 (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.
 Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis.

Weekly notifications* of acute poliomyelitis in 1953 compared with those in the years 1952—1947.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenza pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 7th November, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 7th November, 1953. } Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when average is for periods of five weeks.

Notes.

Monday—Cloudy. Continuous rain, frequently heavy, from early morning until mid-evening. Fresh to strong wind 14h. (S), gusts exceeding 38 m.p.h.:—10.35h. (S), 11h.—11.10h. (SSE), 11.40h.—12.15h., 12.30h.—16h. (S).

Tuesday—Cloudy at first, fine to fair in morning; cloudy around mid-day, then fair to fine. Light showers late morning and afternoon, heavy 12.30h. Fresh wind 0.0h.—04.50h. (SW). Dew in evening.

Wednesday—Fine until mid-morning, fair for a short time, then cloudy rest of day. Intermittent light rain in evening. Light to light rain late. Shallow fog early. Frost in morning, dew in evening.

Thursday—Cloudy until around 0.8h., then fine; fair in late morning and early afternoon, then fine again. Continuous rain, heavy 00.20—30h., 00.40h., 00.50h.—0.1h. Fog in evening, thick 22.30h.—24h. Dew in morning, frost in evening.

Friday—Fine early, then sky becoming obscured by fog until early morning, afterwards cloudy until mid-evening. Intermittent light drizzle and rain morning and afternoon. Fog all day, thick 0.0h.—06.30h., and 18.45h.—22h. morning and evening.

Saturday—Fine until late morning, fair until early afternoon, cloudy until mid-evening, then fine again. Mist early; haze noon, then mist for a time. Frost in morning; dew in evening.

Sunday—Cloudy. Intermittent light drizzle in morning and evening; light to moderate rain in evening, heavy 21.15h. and 08.15h.—20.25h. (SSW—SW), 21h.—21.10h. (SW), 21.30h. (W).

The reading of the barometer fell from 999.9 mbs. at beginning of week to 984.8 mbs. at 15.45h. on 1st, rose to 999.9 mbs. at 10.45h. on 3rd, fell to 1001.2 mbs. at 02.50h. on 4th, rose to 1019.0 mbs. at 24h. on 4th, fell to 1015.6 mbs. on 5th, rose to 1030.2 mbs. at 17h. on 6th, fell to 1017.4 mbs. at 16.15h. on 7th, rose to 1019.9 mbs. at end of week.

Notes.

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from the photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

Obtainable from

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and) at different age periods) registered in the week ended 14th November, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

Weekly Averages:—											
1953 Oct.	131,600	11,500	14,600	23,100	10,500	12,800	6,800	17,800	12,000	5,400	7,100
*1952 Oct.	121,600	10,500	12,500	20,400	9,500	12,000	6,500	17,400	11,700	5,200	6,800
1952 Nov.	122,800	11,000	13,100	21,800	9,700	11,900	6,600	16,600	11,400	5,200	6,600
(b) New claims to injury benefit.											
Week ended:—											
Nov. 10	14,600	2,100	2,300	1,900	1,500	1,300	600	1,100	1,000	400	600

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 14th November, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

day—Cloudy. Light to moderate rain at times morning and afternoon, heavy 11.25h., 12.15h., 12.25h. Inter-
mittent drizzle in evening. Fresh wind 13.40h.—24h. (SSW—SW).

day—Cloudy, becoming fair in early evening, then fine. Light to moderate rain in morning, heavy at times,
moderate to light until early afternoon. Mist late afternoon and evening. Fresh wind 0.0h.—05.40h., 08.05h.
Dew in evening.

day—Generally fine, except for a period in mid-afternoon, when fair; becoming fair in evening. Frost in
evening.

nesday—Fair at first, then cloudy. Dew in morning.

rsday—Generally cloudy. Light showers morning and afternoon. Fresh wind 01.35h.—02.50h., 07.20h., 07.35h.,
(W).

ay—Cloudy. Intermittent light drizzle and rain at times. Fresh wind 17.50h., 19.30h.—24h. (SW).

riday—Cloudy. Intermittent light rain in evening. Fresh wind 0.0h.—02.50h., 04.35h.—06.40h., 10.30h. (SW),
13.30h. (SW—WSW).

reading of the barometer fell from 1019.9 mbs. at beginning of week to 1012.8 mbs. at 07h. on 9th, rose to
1015.2 mbs. at 01h. on 11th, fell to 1021.0 mbs. at 04h. on 13th, rose to 1027.0 mbs. at end of week.

Notes

Results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the
barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column
11 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived
from graphic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended
1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright
sun each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and
mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE
AND
GENERAL REGISTRY OFFICE, SCOTLAND

Census 1951

GREAT BRITAIN

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

 NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of fast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 21st November, 1953, with totals from the first week of the year to date. } **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

1952 Nov.	122,800	11,000	13,100	21,800	9,700	11,900	6,600	16,600	11,400	5,200	6,600

(b) New claims to injury benefit.

Week ended:—											
Nov. 17	14,800	2,100	2,200	2,000	1,600	1,300	600	1,200	1,000	400	600

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 21st November, 1953.

Column ...	3	4	5	6	7	8	9	10	11	12	13	14

Notes.

Sunday—Cloudy. Dew in morning.
Monday—Cloudy at first, then fine around 06h., becoming fair most of day, except for a period in morning, when cloudy. A time in morning, and again in evening, thick 19h.—24h. Dew most of day.
Tuesday—Cloudy for a short time, then sky obscured by fog all day. Thick fog until mid-evening, becoming clear. Dew most of day.
Wednesday—Sky obscured by fog until about 08h., then cloudy. Fog until early afternoon and in late afternoon, then clear all day.
Thursday—Cloudy at first, then fair until late afternoon; cloudy in early evening, becoming fine. Mist early, shallow fog 08h., haze in afternoon, then fog. Dew morning and evening.
Friday—Fine at first, then sky becoming obscured by fog until mid-morning. Fog again until mid-afternoon, thick 1.55h.; mist for a short time.
Saturday—Cloudy.
The reading of the barometer rose from 1027.0 mbs. at beginning of week to 1034.2 mbs. at 21.30h. on 16th, fell to 1028.7 mbs. at 15h. on 18th, rose to 1033.2 mbs. at 10.30h. on 20th, fell to 1028.7 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.
The observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.
The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.
The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).
The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.
The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

Census 1951

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946 i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notification are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

(b) **Great Towns in the aggregate.**[†]

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

**Great Towns, Greater London
and four Scottish and Irish
Towns.**

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 28th November, 1953, with totals from the first week of the year to date. **London.**

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 28th November, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

(b) New claims to injury benefit.

Week ended:—											
Nov. 24	14,100	2,000	2,300	1,800	1,500	1,300	500	1,100	900	400	600

* See Note 3.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.
- (3) The weekly averages are usually for periods of four weeks, but the months are marked * when the average is for periods of five weeks.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 28th November, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Cloudy.

Monday—Cloudy.

Tuesday—Cloudy. Light to moderate rain in evening, heavy 20.25h., 20.40—50h. Mist in late afternoon.

Wednesday—Cloudy until mid-afternoon, becoming fine until mid-evening, then sky obscured by fog. Fog for a time clearing, mist at times until late afternoon, then shallow fog, thickening rapidly and becoming general, thick 16.35h.—

Thursday—Generally cloudy, with periods in morning and afternoon when fair. Intermittent light rain at times until mid-day, and heavy at 06.05—15h., 11.02—15h., 11.30—45h., 12.10h. Fresh wind SSW: 12.20h.,—15.05h., 16.40h.,—

Friday—Cloudy. Intermittent heavy rain at 07.35h. Light showers in late afternoon. Fresh wind 0.0h.—03.15h. (SSW), —05.45h., 09.25—40h. (S).

Saturday—Generally cloudy until early afternoon, then fair to fine. Mist in late afternoon, then fog; mist again late.

The reading of the barometer fell from 1028.7 mbs. at beginning of week to 1022.5 mbs. at 04.40h. on 24th, rose to 1028.7 mbs. at 11h. on 25th, fell to 1009.7 mbs. at 15h. on 27th, rose to 1018.8 mbs. at 24h. on 28th.

Explanatory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

Census 1951

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I and II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of Pensions and National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951. “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neonatal Mortality—about the end of April.

TABLE II.—continued.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, i.e., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 5th December, 1953, with totals from the first week of the year to date. } **London.**

(See Notes on page 2).

(b) New claims to injury benefit.

Week ended:—											
Dec. 1	14,000	2,000	2,200	1,900	1,500	1,200	500	1,000	1,000	400	600

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

Notes.

Sunday—Fine until morning, then sky becoming obscured by fog for a time; afterwards generally cloudy. Intermittent rain in evening. Fog in morning, thick 08.30h.—10h. Dew until evening.

Monday—Cloudy until early evening, then fair for a time. Shallow fog, and mist, in evening. Dew morning and g.

Tuesday—Cloudy until early evening, becoming fine until morning, then sky obscured by fog for a time; then fine until noon, becoming fair, then cloudy. Fog until around mid-day, thick 04.30h.—09.25h.

Wednesday—Cloudy at first, becoming fine until morning, then cloudy again for a time, becoming fair until mid-g, then fine. Shallow fog for a time in evening. Dew all day.

Thursday—Fine at first, becoming cloudy by morning and remaining so. Intermittent light to moderate rain in after- and evening. Dew in morning.

Friday—Cloudy until late morning, then fair, becoming cloudy again for a time in afternoon; fair to fine until early g, then cloudy again. Fog for a time in evening.

Saturday—Cloudy. Continuous light drizzle in morning; intermittent in afternoon. Mist in morning, then fog until morning, mist again until mid-afternoon.

The reading of the barometer fell from 1018.8 mbs. at beginning of week to 1014.8 mbs. at 03h. on 30th, rose to mbs. at 10h. on 1st, fell to 1004.0 mbs. at 18h. on 3rd, rose to 1024.2 mbs. at end of week.

atory Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the eter is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column illibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived hotographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright e on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and eadings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

Census 1951

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables 1, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of Pensions and National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

 NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

E I. Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.†

(See Notes on page 2).

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

including influenzal pneumonia.

The 160 Great Towns represent about 10 per cent. more population than the 126 Great Towns from which returns were received in years before 1952. The accumulated totals for 1951 have been adjusted to produce figures approximately comparable with those shown for 1952 and 1953.

LE II.—Births and Deaths (distinguishing Deaths of infants under 1 year of age) registered in the week ended 12th December, 1953.

Great Towns, Greater London and four Scottish and Irish Towns.

(See Notes on page 2).

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-resident in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 12th December, 1953, with totals from the first week of the year to date. **London.**

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in
the week ended 12th December, 1953.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A Cholera.	B Plague.	Meningococcal infection D	Paralytic E	Non-paralytic F	Acute polio-myelitis EF	Infective G	Post Infectious K	Acute enceph-GK alitis	H Typhus fever.	I Relapsing fever.	J Continued fever, (London only).	L Dysentery.	M Ophthalmia neonatorum.	N Puerperal pyrexia	O Smallpox.	P Paratyphoid fever.	R Typhoid fever.	S Food poisoning.

returns are not shown. Districts for which no return has been received are as follows:—Chester.

returns still outstanding for week ended 5th December, 1953:—

Urban Districts:—Lynton (Devon), Amble (Northumberland), Knighton (Radnor).

Rural Districts:—Bellingham (Northumberland), New Radnor (Radnor).

TABLE V.—New claims to (a) sickness benefit under the National Insurance Act and (b) injury benefit under the National Insurance (Industrial Injuries) Act.

England and Wales
Standard Regions

(Figures to nearest hundred).

(Supplied by the Ministry of Pensions and National Insurance).

Period	England and Wales	Standard Regions									
		Northern	East and West Ridings	North Western	North Midland	Midland	Eastern	London and South Eastern		Southern	South Western
								London & Middx.	Remainder		
1	2	3	4	5	6	7	8	9	10	11	12
(a) New claims to sickness benefit.											
Week ended:—											
Dec. 8	144,400	10,100	12,800	20,000	9,200	10,800	6,300	15,000	10,500	5,000	6,400
Dec. 1	121,500	10,700	13,700	20,700	9,800	11,600	6,900	16,300	11,300	5,300	6,600
Nov. 24	122,300	11,200	13,700	21,700	9,800	11,700	6,500	16,000	11,100	5,200	6,800
Nov. 17	129,900	12,200	14,700	22,800	10,200	12,500	6,800	17,100	11,800	5,600	6,900
Weekly Averages:—											
1953 Nov.	129,100	12,100	14,600	22,800	10,300	12,400	6,700	17,000	11,700	5,400	6,900
1952 Nov.	122,800	11,000	13,100	21,800	9,700	11,900	6,600	16,600	11,400	5,200	6,600
1952 Dec.	127,000	10,800	13,100	21,600	9,700	11,600	6,900	19,300	13,000	5,400	6,600

(b) New claims to injury benefit.

Week ended:—											
Dec. 8	13,500	2,000	2,100	1,800	1,400	1,200	600	1,000	900	400	600

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 12th December, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Cloudy, with sky obscured by fog around mid-day. Intermittent light rain in early morning. Mist in morning, in late morning until mid-afternoon, then mist for a time.

Monday—Cloudy. Fog from morning until mid-evening, then mist. Dew morning and evening.

Tuesday—Cloudy. Intermittent light drizzle in morning. Mist in morning, and from late evening. Dew in evening.

Wednesday—Cloudy. Intermittent light drizzle morning and afternoon. Mist early, and from afternoon until mid-evening. Dew in morning.

Thursday—Cloudy. Fog in morning, thick 07h.—10h., then mist; fog again in afternoon until mid-evening, thick 11h.—19h. Intermittent light rain in late afternoon. Dew in evening.

Friday—Cloudy. Intermittent light rain in morning. Mist from mid-morning until late afternoon.

Saturday—Cloudy. Intermittent light drizzle in afternoon and evening.

The reading of the barometer fell from 1024.2 mbs. at beginning of week to 1015.8 mbs. at 06.45h. on 8th, rose to 1019.7 mbs. at 10.30h. on 11th, fell to 1021.4 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

Census 1951

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables 1, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of Pensions and National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE II.—continued.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

¶ Return not received.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 19th December, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

1952 Dec.	127,000	10,800	13,100	21,600	9,700	11,600	6,900	19,300	13,000	5,400	6,600

(b) New claims to injury benefit.

Week ended:—											
Dec. 15	12,300	1,800	1,900	1,600	1,300	1,100	600	1,000	800	400	600

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 19th December, 1953.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

Notes.

Sunday—Cloudy. Intermittent light to moderate rain in morning, heavy 08.55h. Mist in morning, then fog until noon.

Monday—Cloudy at first, becoming fine for a time in morning, then cloudy. Intermittent light drizzle in afternoon. Moderate rain in evening, heavy 18.15—50h. Dew in morning.

Tuesday—Cloudy. Sky obscured by fog in morning and evening. Light rain early, heavy 02h.—02.45h. Mist early, most of day until mid-evening, thick 05h.—10.30h., then mist.

Wednesday—Sky obscured by fog at first, then generally cloudy, except for a period in afternoon, when fair. Mist for afternoon, and in evening. Dew in evening.

Thursday—Cloudy until morning, then cloudless most of day, except for a period in afternoon, when fair. Mist early; morning until end of day, thick 20h.—24h. Fresh wind 09.45h. (E). Dew all day.

Friday—Fine at first, then cloudy until mid-morning, afterwards sky obscured by fog. Intermittent light drizzle in afternoon. Thick fog until mid-evening, becoming moderate, then mist. Dew all day.

Saturday—Sky obscured by fog at first, then fine until morning, afterwards cloudy. Intermittent light drizzle in late afternoon and evening. Mist in morning. Fresh wind 11.25h.—13.40h. (NNW), 14.25h.—19.30h. (N—NNE).

The reading of the barometer fell from 1021.4 mbs. at beginning of week to 1010.1 mbs. at 14h. on 14th, rose to 1015.3 mbs. at 23h. on 16th, fell to 1015.3 mbs. at 06.10h. on 19th, rose to 1022.9 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from synoptic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

Census 1951

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables 1, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of Pensions and National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Tables 20 and 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. as of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of fast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenza pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 26th December, 1953, with totals from the first week of the year to date. London.

(See Notes on page 2).

(b) New claims to injury benefit.											
Week ended:—											
Dec. 22	12,300	1,800	2,100	1,500	1,300	1,000	500	800	700	300	500

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.

Notes.

Monday—Cloudy until late morning, then fair until early afternoon; cloudy again until late afternoon, then fine. Fog in afternoon, thick 19h.—24h. Dew morning and evening.

Tuesday—Fine at first, then sky obscured by fog until late morning, afterwards cloudy. Intermittent light rain in afternoon and evening. Fog, thick 00h.—08.45h., 08.50h.—09.15h., until mid-day. Frost in morning.

Wednesday—Cloudy. Intermittent light to moderate rain in morning and evening.

Thursday—Cloudy at first, becoming fine until morning, then sky obscured by fog until early afternoon; afterwards fair until mid-evening, then fair. Fog from morning until mid-afternoon, thick 08h.—10.45h., 11h.—14h.

Friday—Fair to cloudy until mid-morning, becoming fine until mid-evening, then cloudy again. Intermittent light rain in morning. Fresh wind 12.15h. (W).

Saturday—Cloudy until mid-morning, then generally fine, except for a period in afternoon, when fair. Intermittent light rain early; light and moderate showers in morning.

Sunday—Fine to fair at first, then cloudy. Intermittent light rain in afternoon and evening, becoming light to moderate, 15.0h.—22h., 22.10h. Fog for a short time in morning. Fresh wind 16h.—16.20h. (SW), 18h.—21.20h. (SW—W).

The reading of the barometer rose from 1022.9 mbs. at beginning of week to 1029.0 mbs. at 21.30h. on 20th, fell to 1017.3 mbs. at 05h. on 24th, rose to 1025.6 mbs. at 10.05h. on 26th, fell to 1015.5 mbs. at 21.10h. on 26th, rose to 1017.8 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column 1 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from synoptic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1952. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

Census 1951

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables 1. II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table V) are supplied by the Ministry of Pensions and National Insurance. Meteorological data (Tables VI and VII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1951; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually; those for Greater London, London and the County Boroughs are distinguished separately in Table 21 of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

TABLE II.—continued.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate. Influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List* and at different age periods) registered in the week ended 2nd January, 1954, with totals from the first week of the year to date. London.

(See Notes on page 2).

* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in the
week ended 2nd January, 1954.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2).

Note :—Where no return has been received an asterisk * is inserted in the columns. Totals
shown against the names of counties include any associated county boroughs. Letters in the
"Others" column denote the diseases so lettered in the summary headings.

(b) New claims to injury benefit.

Week ended:—											
Dec. 29†	9,600	1,500	16,00	1,300	1,100	800	300	600	600	200	300

† The local offices of the Ministry of Pensions and National Insurance were closed during the week ended December 29th for one or more days.

- Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.
- (2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class "employed persons" under the main scheme.

TABLE VI.—Air Temperature, Rainfall and Sunshine in the week ended 2nd January, 1954.

Notes.

Sunday—Cloudy at first, becoming fine until late morning, then fair to cloudy until mid-evening; afterwards fine.
Wind 12.45h.—13.10h., 13.40—55h. (NNW).

Monday—Fine to fair until late morning, then generally cloudy, except for a period in mid-afternoon, when fair.
Morning.

Tuesday—Cloudy at first, then becoming fine until early afternoon, becoming cloudy for a time; fine again in early
then cloudy. Shallow fog in morning. Frost in morning; dew in evening.

Wednesday—Cloudy. Intermittent light rain morning and afternoon, continuous light to moderate in evening, heavy
Fog from morning until late afternoon.

Thursday—Cloudy until early afternoon, becoming fine. Light to moderate rain until early afternoon, mainly inter-
A light shower in evening. Dew in evening.

Friday—Generally fine until early evening, except for a period in afternoon, when fair; becoming cloudy later. Mist
ing; haze in afternoon. Frost most of day.

Saturday—Cloudy until mid-morning, then fine for a time; fair to cloudy in afternoon and evening, but sky
l by fog for a time in evening. Intermittent moderate to light rain in morning. Fog most of day, thick 15.15h.—

The reading of the barometer rose from 1017.8 mbs. at beginning of week to 1026.7 mbs. at 21.45h. on 27th, fell to
mbs. at 14.40h. on 28th, rose to 1037.5 mbs. at 09h. on 2nd, fell to 1030.5 mbs. at end of week.

Notes

The results apply to the civil day, i.e., from midnight to midnight, Greenwich Mean Time. The height of the cistern of the
is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h., 6h. and 9h. P.M. The readings of the barometer shown in column
(millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived
photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended
in reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright
on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and
readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

Census 1951

1% SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.

PART I contains information about Age and Marital Condition of the Population, Occupations, Industries, and Housing of Private Households.

Price 17s. 6d. net. By Post 17s. 10d.

PART II contains information about the Characteristics and Composition of Private Households, Non-Private Households, Education, Birthplace and Nationality, Fertility, Welsh and Gaelic Languages, and a Conurbation Supplement.

Price £2 0s. net. By post £2 0s. 6d.
